"*Montgomery Ward Co. Catalogue.* Chicago, 1916.
From Main Stacks, University Library, University of Illinois at Urbana-Champaign.

The Montgomery Ward Catalogue began in 1883, and became popularly known as the "Wish Book." It was a retail sales book that became very popular with Americans, who could order items from the catalogue and have them mailed to their home. It originally started out as an 8 by 12 inch single-sheet price list, showing 163 articles for sale with ordering instructions and soon grew to become a 1,000+ page catalogue such as the 1916 example displayed in the case.

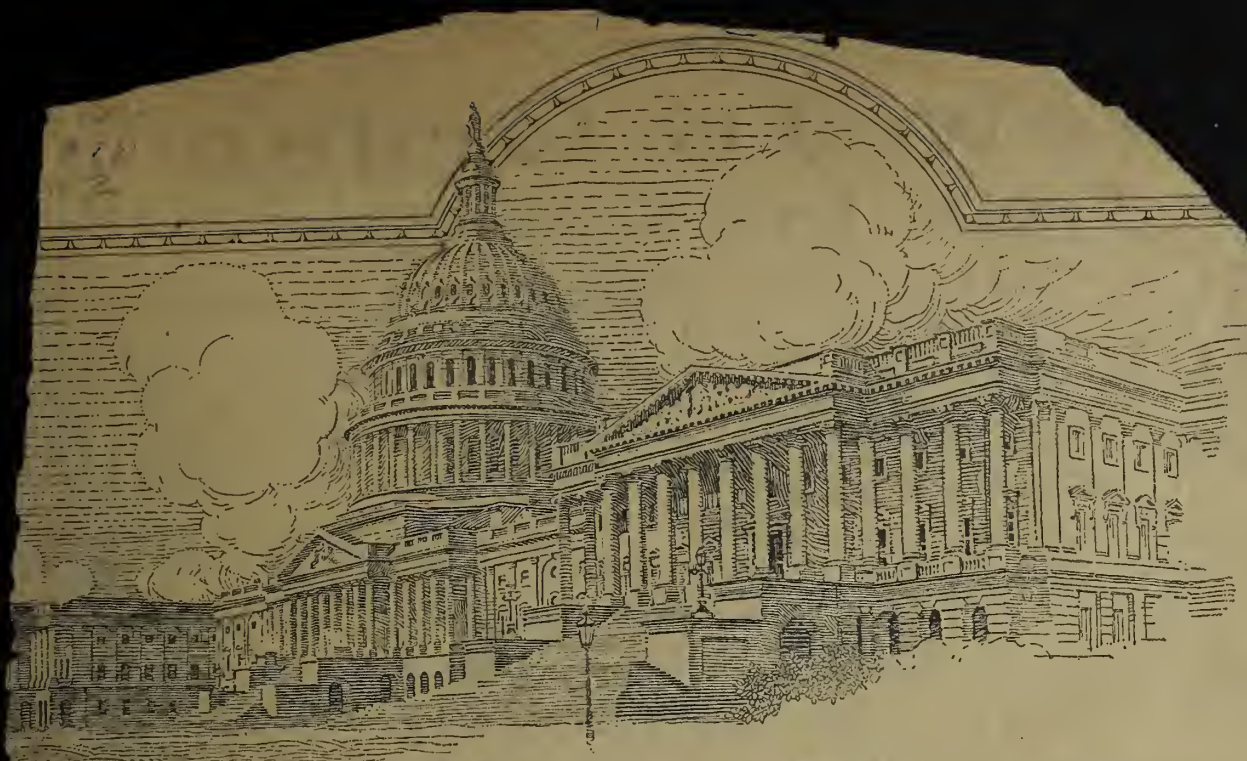
Our Guarantee



The guarantee of this house has been written by its patrons. No promise that we can write is half as strong as the word of a million people who have definitely declared: "This house is absolutely on the square. I have dealt with it for years and I know."

The steadfast endorsement of a million people is the only real guarantee that has the strength to hold up its head and look the world squarely in the face. We promise you that every article illustrated or priced in this book will reach you precisely as described and in perfect condition and give entire satisfaction, or you may have your money back without argument and *what's more*, we will refund you the transportation charges both ways.

Our next Catalogue will be issued in the early part of January, 1917, and will completely replace this one. It will contain a complete new showing of merchandise, embodying the most fashionable wearing apparel, as well as the latest designs in various branches of manufacture.

A National Institution

ABOUT the same time that the house of Montgomery Ward & Co., was founded, back in the year 1872, a philosopher in Massachusetts, Ralph Waldo Emerson, by name, penned twelve words that were to be remembered and repeated throughout the world:

"A great institution is but the lengthened shadow of a great man."

The beginning in 1872 was humble. The quarters were small and our offerings were limited. But the spirit that dominated the organization and the policy of our merchandising was broad—big. For those responsible for that spirit, that policy, were two big men. They were A. Montgomery Ward and George R. Thorne—men who cherished business ideals far in advance of those of the commercial life of that day.

From these two men came the revolutionary doctrine, "The cu
always right." Nothing just like that had ever been introduced
business world and made a part of business ethics. Instead, "let t
beware," had been the motto of the business world from time imm
and was accepted as principle in law.

The Montgomery Ward idea marked an epoch in American bu
standards.

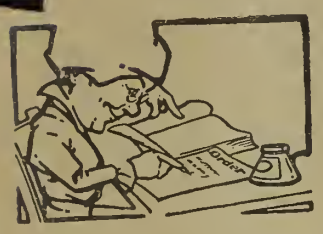
Another innovation was a rigid adherence to fact—the truth in e
word of description, every claim made by this house in its "Catalogue
Buyers' Guide," in all its circulars and in all its advertisements. In t
day, exaggeration was expected to be found in advertising. "Adverti
ments must be taken with a grain of salt," was the saying. But t
soon began to understand that there was one house that mad
statements in its catalogue.

From the first little store located on Kinzie Street in Chicago,
panded, until it is today, truly a National Institution.

In addition to the plant here in Chicago, there is our New York plant—
our Kansas City house—our younger branches in Fort Worth and Port-
land, Ore.

The fact that the house now extends its arms all over the world—
have customers in every Civilized country—enables us to perform servi
that we could not deliver if we had to depend upon one central plant.

No matter where you live in the world, if trains, express or mail
reach you, our service is yours to command.

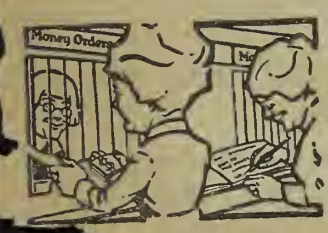


Very cordially yours,

How To Order From This Catalogue

The First Step

Suppose there is some certain article you want, use the index on the blue pages in middle of the book which will show you the page on which any article is located.

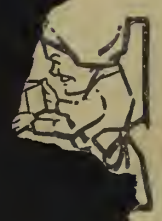


Writing Out Your Order

Write out your order on one of our regular order blanks if you have one; but any plain piece of paper will do if you haven't an order blank. Please give the number, name and price of each article.

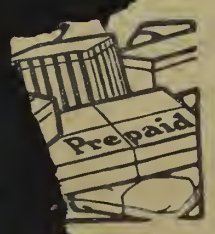
Size and Color

When selecting articles made in different colors and sizes, don't forget to give us this information, just as you would if you were buying goods in a store.



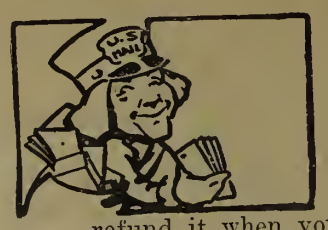
How to Send Money

You can send money by your Personal Check, if you have a bank account; by Post Office Money Order; Express Money Order; Bank Draft; or Cash, by Registered Letter. If you live on a rural route and desire to send Post Office Money Order, your letter carrier will buy the money order for you and will enclose and mail it to us with your letter. Simply give him the money and your letter. He will do the rest. You need not go to the Post Office. We will guarantee the safe arrival of money sent in any of the above ways.



Shipping

We will ship your order any way you want, by Express, Parcel Post or Freight. It is wise to bear in mind that 20 pounds of freight usually costs the same as 100 pounds. It is cheaper for you to see that your freight order comes to 100 pounds or over.



Shipping in Plain Packages

If you want your goods shipped in plain unmarked packages, we will do so if you request it when you send in an order.

Here Are Your Freight and Express Rates

Freight

If there is no agent in your town the freight charges must be prepaid; otherwise you may pay the charges when the goods arrive. We aim to pack goods so that the shipments will take the lowest freight rates.

The railroads divide merchandise into several classes, each class having a different freight rate. The classification is not the same throughout the country, and in the table on the preceding page the classes are given under three heads—West, East and South. WEST includes Illinois, Wisconsin, and all states west of the Mississippi River. EAST includes Indiana, Virginia, West Virginia and all states north and east thereof. SOUTH includes the southern states situated east of the Mississippi River.

To Figure Freight Charges

First find to what class the article you have in mind belongs. If the classification on the opposite does not show that article, take the class for something similar. Then find the rate per 100 pounds on that class of freight from Chicago to your town or to the nearest town shown in the list and multiply that rate by the weight of the article, which is given in the catalogue.

Express

Express is a quick and safe method of shipping. The express agent in your town will explain his company's service, and will tell you the correct charges on any shipment. Below we give the express rates for 100 pounds from Chicago, to a number of towns, and also a scale by which you can figure the charges on smaller packages.

For example, by referring to the table you will find that the express rate per 100 pounds to St. Cloud, Minn., is $2.50. If your order weighs, 10 pounds, you will find in the scale that 10 pounds, at the rate of $2.50 per 100 pounds, will cost 47 cents. If the rate per 100 pounds to your city is not given in the scale, figure the charges on the basis of the town nearest to you that is shown.

Scale of First-Class Express Charges

This is an official scale of Graduated Charges Used by All Express Companies

In the column under your rate, opposite the figures corresponding with weight of your package, will be found the amount you will be required to pay. If the exact weight of your goods or the rate to your Station is not shown, refer to the next higher weight or rate, and the result will be within a few cents of the correct charge. For example: If your rate is $3.00 per 100 pounds, and your package weighs 15 pounds, the express charges will be 66 cents, except on Groceries. The charge on Groceries is one-fourth less than the charge on other merchandise.

How to Use the Parcel Post

ASK your postmaster what zone your postoffice is in from Chicago. The postage on all packages depends on distance as well as weight. We give you the shipping weight of every article in this catalogue. When you make out your order, add up weights of the different articles you want sent by Parcel Post. Then find the correct postage as given in the table below, and add this amount to your remittance. Always include the amount of the postage when you order goods sent by Parcel Post. Postage on Parcel Post must be prepaid.

If in a hurry use Parcel Post or Express but to get the greatest saving make up an order of 100 pounds or more and have it shipped by freight.

ALL merchandise sent by mail takes the Parcel Post rates. Packages weighing four ounces or less are carried anywhere in the United States for 1 cent an ounce. Packages weighing more than four ounces are charged for by the pound, and the rate per pound varies according to the distance the package must travel. The table herewith shows the distance covered by each of the parcel post zones. Parcel Post mail is handled just like any other mail. If you have a rural delivery, it will be delivered to your mail box, or if you live in a city or town having carrier service, it will be delivered at your door, otherwise you will receive parcel post packages with your other mail at the postoffice.

Restrictions

Books in packages weighing 8 oz. or less may be mailed for ½ cent an oz., books weighing over 8 ounces can now be sent at the regular parcel post rates per pound. Liquids, except poisons, intoxicating liquors, and those of an inflammable or explosive nature, may be mailed as follows; in single glass bottles not exceeding 16 ounces; in bottles of 4 ounces or less each, the total weight must not exceed 24 ounces; or in sealed cans, it must not exceed 11 pounds.

Weight Limit

Packages weighing not more than 20 pounds may be mailed to any zone. Packages weighing over 20 pounds and up to 50 pounds may be mailed only to points in first and second zones.

Size Limit

If the combined length and girth is over 7 feet, a package may not be sent by parcel post. Run a tape line around the package the short way, and to this measurement add the length of the long side; if the total is less than 7 feet the package may be sent by parcel post.

Always Build Your Freight Order Up to 100 Pounds or More

Up to 100 pounds you pay freight for 100 pounds, whether you have 10 pounds or 100—over 100 pounds you pay only for what you get. Thus, if 100 pounds cost you 60c for freight, 110 pounds would cost you only 66c—one and one-tenth times 60c; 140 pounds would cost you 84c; and 175 pounds would cost you $1.05. Always build your freight order up to 100 pounds or more.

Useful Information: Facts You May Need Some Day

About the Earth and its Neighbors

Earth's diameter at the equator is 7,926.5 miles; at the pole, 7,899.5 miles. Circumference at the equator is about 25,000 miles, and its surface area is 197,108,500 square miles. Distance from the sun is 92,900,000 miles. It takes a sunbeam 8 minutes 8 seconds to travel from the sun to the earth. The earth is traveling in its path around the sun at the rate of 19 miles per second.

The sun's surface is 12,000 times and its volume is 1,300,000 times that of the earth. The moon has a diameter of 2,162 miles, and a circumference of 6,800 miles. It is only 238,000 miles from the earth.

The planets, in their order from the sun, are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune. Mercury is the smallest and is nearest the sun, being only 36,000,000 miles from it. Jupiter is the largest planet; its diameter is 11 times that of the earth. Neptune is farthest from the sun, 2,791,600,000 miles.

40 rods make ..... 1 furlong
8 furlongs make ..... 1 mile
3 miles make ..... 1 league
69⅛ miles make ..... nearly 1 degree
6,075⅔ feet make ..... 1 nautical mile

Square Measure

For surfaces having length and width only.
144 square inches make ..... 1 square foot
9 square feet make ..... 1 square yard
30¼ square yards make ..... 1 square rod
40 square rods make ..... 1 rood
4 roods make ..... 1 acre
640 acres make ..... 1 square mile

Square Rods and Feet to an Acre

An acre contains 43,560 square feet.
A plat of ground 208 feet and 8½ inches square is very nearly an acre, being 43,559⅛ square feet.
A plat of ground 12 rods 10 feet 8½ inches square is an acre. For ordinary purposes it will answer to take a plat 12⅔ rods square, which will give 160⅔ rods, 160 being an acre.

Cubic or Solid Measure

For all bodies having length, width and thickness.
1,728 cubic inches make ..... 1 cubic foot
27 cubic feet make ..... 1 cubic yard
128 cubic feet make ..... 1 cord (wood)
40 cubic feet (shipping) make ..... 1 ton

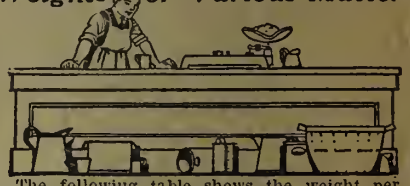
Land Surveying



A township is 6 miles square and contains 36 sections, which are numbered from the northeast corner of the township across to west and back on the second tier to east, then west again on the third tier, as shown in the diagram on the right. Section 16 is designated as School Land; also section 36 in some of the new states.

The township lines running north and south are called Ranges, and are numbered east and west from the principle meridian. The townships are numbered N. and S. from an established Base Line.

This diagram represents a section of land and its subdivisions, described as follows: A is the north half of the section, and contains 320 acres. B is the southwest quarter of the section, and contains 160 acres. C is the west half of the southeast quarter, and contains 80 acres. D is the northeast quarter of the southeast quarter, and contains 40 acres.

Weights of Various Matter

The following table shows the weight per cubic foot:

Granite, per cubic foot	160 lbs.
Berea Stone, per cubic foot	140 lbs.
Brick, in mortar, per cubic foot	110 lbs.
Granite, per cubic foot	160 lbs.
Limestone, per cubic foot	144 lbs.

White Pine, seasoned, about	30 lbs.
White Oak, seasoned, about	52 lbs.
Loose earth	95 lbs.
Common Soil, compact	124 lbs.
Clay, about	135 lbs.
Marble	166 lbs.
Brick	125 lbs.

Convenient Measure

One quart of wheat flour is one pound. One quart of cornmeal weighs eighteen ounces. One quart of butter, soft, weighs fourteen to sixteen ounces. One quart of brown sugar weighs from a pound to a pound and a quarter, according to dampness. One quart of white sugar weighs two pounds. Ten medium sized eggs weigh one pound. A tablespoonful of salt is one ounce. Eight tablespoonfuls make a gill. Two gills, or sixteen tablespoonfuls are half a pint. Sixty drops are one teaspoonful. Four tablespoonfuls are one wine glassful. Twelve tablespoonfuls are one teacupful. Sixteen tablespoonfuls, or half a pint, are one tumblerful. A barrel of ri[ce] weighs 600 po[unds]. A barrel of flour weig[hs] 196 pouuds. [A] barrel of pork weighs [2]0 pounds. A firkin of butter weighs 56 poun[ds]

Size and Weigh[t] of Nail[s]

Estimating the Amount of Material in Building

Lumber comes in even lengths usually 10, 12, 14 and 16 feet. It is figured at so much per 1,000 feet board measure, which means the number of square feet which the material would cover if it were 1 inch thick. To computo board measure, divide the area of the cross section of the stick of lumber in inches by 12, and multiply by the length in feet.

The accompanying table shows the number of feet board measure in lumber from 6 to 16 feet, with a cross section varying from 4 to 16 inches.

Boards less than 1 inch thick are usually sold at so much per square foot, the price depending on the thickness of the lumber.

In estimating lumber allow for waste as follows: Common sheathing add one-tenth for waste, and one-fourth for matched flooring and all kinds of siding. Wire nails are generally preferred in construction as they are easier to use than cut nails, although the latter have greater binding power. Use 10 to 20 penny nails for framing; 8 to 10 penny for sheathing; 6 penny finish or casing nails for clapboarding, and 8 penny for siding. Four penny nails are 1½, 6 penny are 2, and 8 penny are 2½ inches long, etc. It takes about 8 pounds of 5 penny nails to 1,000 shingles; 18 pounds of 6 penny for 1,000 square feet, board measure, of beveled siding; 20 pounds of 8 penny or 25 pounds of 10 penny, for 1,000 square feet of sheathing; 30 pounds of 8 penny for 1,000 square feet of flooring, and 15 pounds of 10 penny or 25 pounds of 20 penny for 1,000 feet of studding. Allow one bag of cement for about 13 square feet of concrete floor, adding one extra bag for every 10 running feet of foundation wall. This is estimated for a floor made 3 inches, of a mixture of concrete, composed of 1 part cement, 2½ parts sand, 5 parts crushed stone. Cover with one-half inch of a finishing coat, containing equal parts of sand and cement.

To Get Rid of Mice and Insects

Ants, To Destroy—Flour of sulphur, ½ lb.; potash, 4 oz.; set in an earthen vessel, over the fire, till dissolved and united. Afterward, beat to a powder, dissolve a little of the powder in water, and sprinkle in places infested by ants.

Red, To Destroy—1. Powdered borax sprinkled around the infested places will exterminate both red and black ants. Powdered cloves is said to drive them away. Another plan is to grease the plate with lard, and set it where these insects abound. They prefer lard to anything else, and will forsake sugar for it. Place a few sticks around the plate for the ants to climb up on. Occasionally turn the plate bottom up over the fire, and the ants will fall in with the melted lard.

2. Use a small amount of oil of turpentine, run into the cracks with an ordinary sewing machine oil can.

To Get Rid of Rats—1. If a live rat be caught and smeared over with tar or train oil, and afterward allowed to escape in the holes of other rats, he will soon cause all to take their departure.

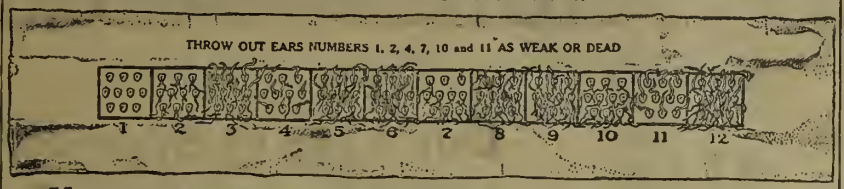
2. Take a pan, about twelve inches deep and half fill it with water; then sprinkle some bran on the water and set the pan in a place where the rats most frequent. The rats fall through the layer of bran and drown.

Mice, To Destroy—1. Take 1 part calomel, 5 parts wheat flour, 1 part sugar and 1/10 part of ultramarine. Mix together in a fine powder and place in a dish. This is a most efficient poison for mice.

2. To keep seeds from depredations of mice, mix pieces of camphor gum in with the seeds. Camphor placed in drawers or trunks will prevent mice from doing them injury.

3. Gather any kind of mint and scatter about your shelves.

Vermin in Watsr—Go to the nearest river or pond, and with a small net (a piece of old mosquito bar will do), collect a dozen or more of the small fish known as minnows, and put them in your cistern, and in a short time you will have clear water, the wiggletails and reddish-colored bugs or lice being gobbled up by the fishes.

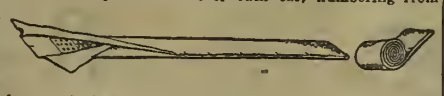


Flies, To Destroy—1. Black pepper (powdered), 1 dram; brown sugar, 1 dram; milk or cream, 2 drams. Mix and place it on a plate or saucer where the flies are most troublesome.

2. Pour 4 parts of strained honey and 2 parts of vinegar into a common tumbler glass, and place in the glass a piece of cap paper, made into the shape of the upper part of a funnel, with a hole at the bottom to admit the flies. Attracted by the smell, they readily enter the trap in swarms, and by the thousands soon collected prove that they have not the wit or the disposition to return.

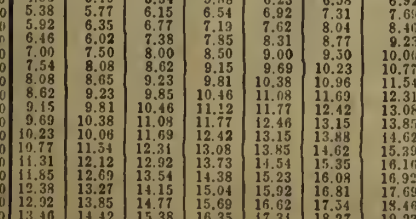
How to Test Your Seed Corn

Every Ear Planted Which Does Not Grow is Costing You Money



The average ear of seed corn has 800 kernels which, if all should grow, would produce 800 stalks which should produce 800 ears of corn. 800 ears of corn would make about 8 bushels. Figuring as low as 50 cents per bushel this would amount to $4.00. Therefore it is safe to figure that every dead ear of corn planted means a loss of $4.00 to you. If you plant only tested seed you can figure upon an increase of 10 bushels per acre or at least $5.00 more per acre in profits.

How to Test Seed Corn for One Acre in a Cloth



Take twelve of your seed ears, selected according to your best judgment, arrange them in a row where they will not be disturbed, or with a tack put a numbered slip on the but of each ear, numbering from one to twelve.

Take a piece of any kind of cloth, a yard or more in length and eight or ten inches in width; mark twelve 3-inch squares down the middle of the cloth, as per diagram, with a wax crayon pencil, and number each square and soak the cloth in water.

Carefully remove six to ten kernels in a spiral around the ear, taking them out with the tip of a pen knife from the edge of the kernel, being careful not to injure the germ.

Place them in numbered squares corresponding to numbers on ears. After dampening the cloth thoroughly roll up a little wet sawdust or sand in the end to help retain the moisture. Fold the cloth over the sides, as shown by diagram, and roll up as shown. Place the roll in a bucket or box of damp sawdust or sand, and put behind the stove or some place where it will not chill. It is best to keep the temperature about 70 degrees, more or less. At the end of five or six days the rolls may be opened, and you can learn from this simple test the condition of your seed corn.

How to Test for Ten or More Acres

Make a shallow box, two or three inches deep, and about 36 to 40 inches square. Mark it off twelve squares one way, by ten across. Fill the box about half full of moist dirt, sand or sawdust. Sawdust is preferred because it is lighter and can be handled in the house. Press it well down so that it will have a smooth, even surface.

Help in Case of Accidents

Drowning—1. Loosen clothing if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's Apple" back (so as to close entrance to stomach, direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. Don't give up! Peoplo have been saved after Hours of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give warm drinks, or spirits in teaspoonfuls, fresh air and quiet.

Burns and Scalds—Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil with lime water.

Lightning—Dash cold water over a person struck.

Sunstroke—Loosen clothing. Get patient into shade and apply ice cold water to head. Keep head in elevated position.

Mad Dog or Snake Bite—Tie cord tight above the wound. Suck the wound; be sure the skin of lips or mouth is unbroken. Cauterize with caustic or white-hot iron at once, or cut out adjoining flesh with a sharp knife. Give stimulants, as whiskey, brandy, etc.

Stings of Venomous Insects, etc.—Apply weak ammonia, oil, salt water or iodine.

Fainting—Place flat on back; allow fresh air, and aprinkle with water. Place head lower than rest of body.

How to Estimate Cost of Making Cement Blocks

The cost of making cement building blocks varies in different localities according to the price of cement, sand, labor, etc.

It averages about 6c to 8c per block (size of block, 8 inches by 8 inches by 16 inches) with a 1 to 4 mixture. One barrel of cement and one cubic yard of sand make from 45 to 50 blocks when using a little less than a 1 to 5 mixture.

The Meaning of Horsepower

The term "horsepower" is used in describing the amount of power produced by an engine or motor. This term dates back to the time when power machinery was first put to use.

In finding an expression which would accurately convey to the mind of another the power of a particular engine, it was natural to say that this engine would do the work of five, ten or more horses, and as this described it in a way that was clear, it became customary to describe the power of an engine as so many times the power of one horse.

Today we still cling to the term "horsepower" in describing the strength of the engine, although the horsepower unit today is greater than the power of an average horse. To speak of an engine of one horsepower today means an engine that has the power to lift 30,000 pounds one foot in one minute.

This Table Will Compute Wages to the Cent

The column in the left hand of the table shows the number of days; and the rate per month is seen in the top line.

To find the amount of 19 days' work, at $11 per month, find 19 in the column of days, then move to the right on the same line till you come under $11 (the rate per month), and you find $8.04, the answer sought.

In all cases, the amount will be found directly under the price per month, and at the right of the given time.

The amount for 11 days at $9 per month, would be found to be $3.81.

In this table, the wages are cast at 26 WORKING DAYS PER MONTH. For a fraction of a day, take an equal part of the amount for one day, and for rates less than $8 per month, half what is shown for twice the amount. Thus, at $6 per month, for 11 days, take half what the tables give for $12, that is, $2.54.

If the wages per month should exceed any provisions made in these tables, the amount may easily be found by taking double what is shown for half such wages.

Our Wearing Apparel Buying Office in the Heart of the Fashion World

RIGHT in the heart of the busy fashion and style center of New York City we have special headquarters for our own fashion buyers. Every day, some new design, or style, is presented to them — some are originated by American modistes, others by foreign designers.

Every day our buyers and their assistants are studying and selecting models and patterns. Manufacturers bring to our special sample room suitings and garments of every description. With such opportunities to get special quantity prices, is it any wonder we can offer you the latest styles at prices far below the regular cost?

Our own designers study the wants of our customers and are erecting and adopting models that not only have the latest touch of style but are becoming and serviceable as well.

Before the garment is accepted every detail must check up accurately with the description and illustration in the catalogue. We cannot afford to disappoint you. If we tell you a garment is made of all wool or pure silk you can rest assured that it is so.

When you order from this catalogue, be it a waist or a suit, you can feel safe about style, quality and money saving.

Fashionable Wearing Apparel of Quality at Lowest Possible Prices

QUALITY is always the first thing considered when we select our merchandise. Every little detail is carefully watched. A thorough analysis of the material is one of the safeguards which we have arranged for your benefit. The cut and fit must be accurate, the tailoring must measure up to a standard entirely our own. Our constant aim is to give more little finishing touches to a garment than is ordinarily found for the price.

In spite of unfavorable and difficult market conditions, we show in this catalogue what we believe to be the greatest values ever offered to our customers. Follow the showing, page by page—read the descriptions—we picture the garments exactly as they are. It will not be difficult for you to make a satisfactory choice. Our guarantee, backed by forty-four years of honest dealing, protects you from any loss.

Be sure to read the following, it will enable you to purchase with greater ease and satisfaction.

Simple Hints on Sizes and Measurements

Children's or Girls' Coats, Bathrobes, Aprons, Raincoats, Raincapes, etc.—give age only. If your child is large or small for her age you know what age she is usually taken for, and that is the age which we need to enable us to forward the correct size.

Misses' and Junior Misses' Dresses, Coats, etc.—order by age. Compare the measurements in the schedule given above each description and see which size most nearly meets your requirements of bust measure and skirt length.

Women's Coats—give bust measurement only.

Women's House Dresses, Kimonos, Aprons, etc.—give bust measurement only.

Women's Dresses—give bust measurement only.

Petticoats fastening with drawstring at the waist—give front length only. Wardway patent-fit petticoats — give waist measurements as well as front length.

Raincoats—give bust measurement only.

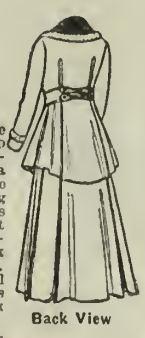
Women's Suits—give bust measurement only.

Misses' and Juniors' Suits—give age. Compare the measurements in the schedule given above each description and see which size most nearly meets your requirements of bust measurement and length.

Women's and Misses' Skirts—give waist measurement and front length.

Waists—give bust measurement only.

In taking measurements be sure to use an accurate tap measure. Place the tape in the positions shown in the cut for the various measurements indicated.



NOTE—All Women's regular size garments shown in this book are carefully proportioned to fit the average figure. The normal waist measurement is about 10 inches less than the bust measurement. Should your requirements call for waist measurement larger or smaller than normal, send us this measurement as well as bust size and we will use our best judgment in filling your order.

To avoid delay in filling your order and to enable us to give you prompt and satisfactory service **be sure to give article number and size wanted, when ordering.** With these details accurately and clearly stated we can give you service equal to that which you would enjoy if you were able to visit our store and select your goods in person.

Back View

Stylish coat made of splendid quality Matelamb, a fur effect fabric with rich markings resembling genuine Baby Lamb fur. This model is cut in full flare effect and falls in a wide sweep in the lower part in accordance with the newest style ideas. It is loose fitting, front and back, and closes with plush-covered buttons and loops. The handsome, broad collar is trimmed with beaver plush, a new fur effect fabric, in a becoming shade of light brown, which looks like genuine beaver fur. Collar may be worn as pictured or fastened in muffler effect about the neck. Roomy, shapely sleeves have wide band of beaver plush in cuff effect. Coat is lined throughout with a highly lustrous cotton fabric of superior quality which has all the richness of silk and guaranteed to outwear the coat. Between lining and coat is a convenient shirred pocket at right side. The fabric in this coat is very desirable and the rich trimming gives it excellent style. It is a special offering at $17.50, and one well worth the consideration of the woman who wants all the style and elegance usually associated with a fur coat, at considerably less cost. **Mention size wanted.**

To illustrate the superb style tendencies for the coming season, we have selected one of the most charming examples for the position of prominence on this page. We have endeavored to show in the illustration, all the graceful becomingness which this remarkable coat possesses. Both fabric and trimming have the approval of fashion. The coat is made of All Wool Velour, a soft, supple fabric with a light nap, noted for exceptional warmth and durability. The trimming is a new fur fabric, called Beaver Plush, a beautiful light brown in color, and with a soft thick pile. It closely resembles Beaver fur. Coat is semi-fitted to the waistline. Below the waistline at front, sides and back is seen an exceptionally graceful flare, trimmed with two bands of the Beaver Plush all around as pictured. Another noteworthy illustration of style is the fashionable muffler collar which when worn buttoned closely at neck, forms the most complete protection against cold and storm which you could possibly secure. When unbuttoned and rolled back, collar shows the graceful outline seen in the small view. A wide band of the handsome Beaver Plush trims the collar, as pictured. Sleeves are set into comfortable armholes and are the new style convent shape, flaring at the wrists in graceful effect where there is a wide band of Beaver Plush for trimming. Large fancy buttons effect the closing. Lined to the waist with a highly lustrous cotton fabric which has all the richness of silk and guaranteed to outwear the coat. **Mention size wanted.**

Warm, dependable material and good style make this coat one of the best in our entire showing. At our price it is a remarkable value, for similar style and quality would undoubtedly cost you more if purchased elsewhere. The material used is Wool Beaver Cloth, a firmly woven fabric in mixture effect with a slight nap on its surface. It gives adequate warmth and protection without excessive weight. The rich fur collar which adds so much to the stylish appearance of the coat is dyed Opossum. It is a dense, very warm, long haired fur that is a glossy black in color and is very durable. The fullness of the garment is held in gracefully across front by a broad belt shaped in one piece with deep side pockets. Belt terminates in rounded outline at each side of back where it is finished with neat buttons as shown in small view. The coat is cut with stylish width and flare around lower part, a feature of all the new styles. Sleeves in newest cut are wide and roomy completed with deep turned-back cuffs of self-material ornamented with buttons. Coat has wide front facings of self-material making it unusually comfortable. No lining is used as material gives sufficient warmth and protection. All inside seams neatly bound. **Mention size wanted.**

If you are looking for a money saving value, a coat that you will be proud to wear, then here is the coat for you. It is made of one of the season's leading materials, fancy Striped Corduroy, in lustrous stripe effect. This fabric is very rich and dressy in appearance as well as very fashionable. The coat is the stylish length and is shaped on up-to-date, loose fitting lines, flaring stylishly around lower part as pictured. The fullness is held in place at waistline by a separate belt of self-material, passed beneath a belt loop at each side. Coat may be worn with or without this belt as desired. Broad stylish shaped collar is trimmed at the edge with a band of lustrous seal plush. Collar is provided with loops and buttons to fasten it closely or may be adjusted in stylish cape effect. The sleeves are joined in graceful raglan outline and are completed with turned-back cuffs headed by plush fold to correspond with collar. Loops drawn over plush buttons effect the closing. The becoming lines of this coat at back are shown in small view. Lined throughout with good quality, durable, black sateen. **Mention size.**

From every standpoint this excellent coat is desirable. Not only can we recommend it for style and becomingness, but for warmth and serviceability as well. The price too is very reasonable, quality considered, and your money will be well invested if you make it your selection. The fashionable, yet very practical material is All Wool Boucle Cheviot. This is an excellent Winter coat material woven in an effective subdued plaid design with a curled nap surface somewhat similar to Astrakhan. Note the smart and becoming style. The front is gracefully fitted by means of plaits just above the stitched simulated belt of self-material. Belt effect is cut in deep pointed outline at each side and extends around to sides of back only, as seen in small view. Around lower part the coat has ample fullness and flares stylishly. New style wide collar is inlaid with lustrous seal plush and fastens with plush covered buttons. Sleeves cut desirably wide at armholes have smart, new bell shaped cuffs, each finished with a plush covered button. This coat is unlined, as the fabric is amply warm and comfortable. Front facings of self-material. All inside seams, neatly bound. **Mention size wanted.**

10C2138—Brown effect.
10C2140—Green effect.

Bust measure .....34 to 46 inches
Length in back.....45 inches

A splendid example of our values is this practical coat exceptionally low priced at $7.98. Every requirement has been carefully considered in the designing of this model. It is serviceable and becoming, is tailored in an excellent manner, and is marked by faultless workmanship that would do credit to a coat at a much higher price. The material is a warm and comfortable Striped Mixture woven of wool and cotton, the cotton being added to increase the wearing qualities of the fabric. The front of the coat is given graceful lines by belt of self-material, cut on the bias, attached at each side and ornamented with double rows of plush buttons. The stylish collar is trimmed at edge with a fold of lustrous black seal plush and is ornamented with buttons made of the same fabric. Sleeves are joined in desirably wide roomy armholes and have turned-back cuffs of self-material. Seal plush covered buttons effect the closing. The back of this coat hangs in graceful rippling outline with ample flare as shown in small view. Unlined, as the material has sufficient warmth and weight. Front facings of self-material. **Mention size wanted.**

This handsome coat is made from one of the most attractive of the fashionable fur fabrics, Ural Lamb Cloth. The surface is woven with lustrous, closely massed curls making it similar in appearance to genuine costly Ural Lamb. The style of the coat is exceptionally pleasing, being cut on fashionable flare lines with sufficient fullness to be appropriate and becoming to women of stout figure. The new style rolling collar is of rich, lustrous Seal Plush. Deep wide revers may be turned back when desired or fastened close up at throat, with large seal plush covered buttons and loops. The comfortable and well cut sleeves are set in roomy armholes and are completed with deep cuffs of self-material. The coat is lined throughout with a lustrous black cotton fabric which has a finish and appearance of satin and is guaranteed to give satisfactory wear.

At back and front there is becoming fullness held in at the waistline with a belt that is broad in back as shown in the small view. Belt is divided in double straps across the front which fasten and are trimmed with fancy buttons. Below the belt the fullness of the coat flares amply in approved fashion. The collar is the new style muffler model which buttons closely around the neck and over the chin, affording ample protection in the coldest weather. This collar may also be turned down in becoming outline as shown in small view. The collar is of Seal Plush, outlined with a band of Nutria plush which is a fashionable fur fabric of light brown color resembling Nutria fur. The deep raglan sleeves insure absolute comfort. Sleeves are finished with flat stitched button trimmed cuffs of self-material. There is a stylish slot breast pocket finished with machine embroidered arrowheads. Slot pocket at each hip finished to match. Novelty buttons effect the closing. The fabric is of sufficient weight to require no lining, but there are inside facings of self-material and all the seams are neatly bound. **Mention size wanted.**

TRADE MARK Wardway Perfect Maternity Garments

That a child may be well and healthy, with a happy, sunny disposition depends largely on the healthy condition and mental state of its mother during the maternity period. Proper maternity apparel plays an important part in accomplishing this end.

The prospective mother who spends much of her time in the open air, or in company with congenial friends, will avoid the depression that will be the lot of the woman shut indoors, solitary.

To enjoy Light, Air and Sunshine You must have proper Maternity Apparel

Choose which course **you** will follow. On the one hand, light, air and sunshine—on the other hand solitary banishment—both courses reflecting in the disposition of your child.

We have made a thoughtful selection in the interest of the prospective mother. Neat, becoming dresses—stylish skirts with the simplest and most practical adjustment—serviceable, warm coats which completely conceal the purpose for which they are intended—maternity blouses which represent the last word in intelligent, special purpose designing. Provision has been made for comfortable bedroom wear—note the attractive kimono on this page.

Most of the garments are so stylishly designed that they can be worn after the maternity period.

Read the descriptions carefully. You will see that there is nothing complicated about

Mrs. Elizabeth Harlan Young

may be of service to you

WE often receive letters from ladies who want a suggestion in regard to some article—it may be furniture or clothes, shoes or table linen, or any of the particular lines of merchandise of special interest to womankind.

It is a pleasure to us to be of such service at all times. We want you to feel that our relations are not merely those of customer and merchant, but of a more friendly nature.

We place all such letters from women customers in the care of Mrs. Elizabeth Harlan Young, who will give them the special attention they require. Mrs. Young will endeavor to represent you in the city.

If you are in doubt what to give, what to buy, what to wear, just drop her a line and she will advise you. Ask her about the latest—whether it is labor-saving household utensils, or lingerie. Let her help you plan your dress for a certain occasion, the baby's layette or the furnishing of your new home.

There is no charge for this special service, and we invite you to avail yourself of it. If you wish her to select your goods, address your inquiries and orders to her in our care. With your letter in hand, she will personally choose what you want from our stock and have the goods packed for shipment.

Some of you know her and are profiting by the acquaintance, but to those who have not conferred with her, we take pleasure in introducing the friend who will represent you at the first mail order house in the world.

Genuine Human Hair Goods

Extra Soft Special Refined Three Separate Strand Switches

This quality is carefully selected, genuine human hair, of a fine texture, which is soft and reliable. The stems are short, workmanship is faultless and all the hair is turned and has been through the most complete process known to insure maximum values. If you compare the quality, workmanship and rich appearance with those that you can buy elsewhere, you will find that our values are unexcelled. Each switch is mounted with silk and made under the most sanitary conditions. The great value of three separate strand switches is that they can be used in any style of hair dressing because each switch can be worn separately if desired.

Please Read These Helpful Hints

When ordering hair goods, send a liberal size sample, free from oil, cut close to the roots, above the ear. State plainly whether you want sample matched in the light, dark or middle part. Place in a separate envelope marked "sample" and pin to your order. Combings do not make good samples. Hair goods cannot be returned after ten days from the time of leaving our store, nor can we take them back if they have been worn. This is for sanitary reasons and your protection. It requires from two to ten days to fill orders, depending upon shade mixture desired. We assure you, however, that each order is given prompt attention and shipped at the earliest possible moment.

Directions for Measuring the Head

No. 1. Around the head, — inches.
No. 2. From forehead to nape of neck, — inches.
No. 3. From ear to ear, across forehead, — inches.
No. 4. From ear to ear, over top of head, — inches.
No. 5. From temple to temple, around back of head, — inches.

Gentlemen who do not require a full wig, but only a top piece or toupee, will please note the following instructions for measuring: Cut a piece of paper size of bald surface on top of head, lay the paper on this surface and plait edges flat so that paper will fit closely, covering the bald spot completely, giving the exact shape of the head. Then draw line with pencil where you wish the hair to be parted.

32C7008—Back Lace

A Wardway Guaranteed Corset stands for superiority in the quality of Corset construction. We put the name Wardway on these two Corset models because you will find in them, correct designing, remarkable wear resisting material, perfect shapeliness and the greatest degree of serviceability. Because we know these are the best $2.00 corsets on the market today, we unhesitatingly guarantee them against six months' hard wear. Material of this back lace corset is of strong white coutil. Japanese embroidery with satin ribbon bow trims the top. Medium low bust. Medium high back. Full over hips. Just the model for medium or even stout figures as it gives long and graceful lines. Boned throughout with extra heavy Duplex Rust-Proof steels. By Duplex steels is meant one light steel over another in such a way as to support each other. In this way they are more pliable and conform to the figure more easily than one heavy steel. Heavy graduated front steels. All the steels have four wear-proof interlinings. Six suspender web hose supporters with rubber buttons. Height of bust above waist, 5 inches. Length of front clasp, 13 inches. Total length in back, 20 inches. You would pay at least $3.00 at retail for a corset of this quality.

32C7012—Front Lace

The case of adjustment and the remarkable comfort of the front lacing corsets have been the reasons for their wonderful growth in popularity. Our Wardway Front Lace Corset has set a sales record rarely if ever equaled before. This season we anticipate our sales of this popular model to more than double our former high record. It is made of strong white coutil with Japanese embroidery trim. Is medium low bust, and high back. The special feature of this remarkable corset is the strip of open Tricot set into the back of the corset, for ventilation, and the extra wide elastic insert at the bottom which holds the corset snug about the hips, yet adjusts it easily and naturally to the figure when seated or walking. It produces the plain slightly curved back so fashionable at this time. Under the front lacing is a tongue with four light steels. This prevents the lacing coming in contact with the body. All the steels are extra heavy Duplex Rust Proof of the same high quality as is used in our 32C7008 and are covered with four wear-proof interlinings. Has six suspender web hose supporters. Height of bust above waist line, 4 ½ inches. Length of front clasp, 11 ½ inches. Total length in back, 20 inches. Corset shops ask from $3.00 to $4.00 for corsets of this quality.

Fancy, Mercerized Brocade, Back Lace Corset, for average figures, at a special low price. This material looks very much like the expensive satin imported brocade. It is strongly woven and will give excellent service. Designed to mould the average figure with the fashionable long slender lines so desirable for the present fashion's trend. Fully gored in front, easily shaping itself to the figure. Corset is trimmed with silk embroidery top and satin ribbon bow. Lightly boned throughout with Rust Proof steels. There is no boning directly over the hips, which insures perfect comfort. Has six suspender web hose supporters with rubber buttons. Two retaining hooks below front clasp hold skirt closely to the figure. Height of bust above waist line, 4½ inches. Length of front clasp, 11½ inches. Total length in back, 17 inches. A splendid value that would sell at retail for at least $3.00 each. **Order size three inches smaller than your waist measure taken over dress.**

How To Adjust Front Lace Corsets

Open laces to full extent down front, so that corset may be clasped around the body easily.

After clasping corset, fasten front supporters only. Bring down corset to position by pulling it down in front, back and sides, drawing up the underwear with the other hand.

Draw in laces at the extreme top of corset and at waistline. This is to prevent corset from slipping up on the body before the lacing is finished.

Then begin lacing at the two lowest clasps and lace corset up to the waistline and down from top gradually. Draw up on the underwear at the top of corset above lacing. Fasten back and side supporters after the lacing is adjusted. Do not attempt to lace the corset close together in front. Opening should be at least 1½ inches.

How to Order Corsets

Back Lace Corsets

In ordering, give your Corset Size. If you know it. If not, take your waist measure, tight over the dress. If you are ordering back lace corsets, subtract three (3) inches. This allows for the lacing. Thus, if your waist measure over your dress is 25 inches, for a back lace corset, order size 22.

Front Lace Corsets

Take your waist measure tight over your dress. If you are ordering front lace corsets, subtract two (2) inches. Thus, if your waist measure, over your dress is 25 inches, for a front lace corset, order size 23.

We supply with any corset from our entire Corset Department, the right length laces to lace them properly, and of a quality seldom given by other dealers.

A complete line of Maternity Corsets is shown on Page 148 of this Catalogue.

Self Help Nemo Wonderlift Corset. Of slightly different construction from 32C7654 and 32C7655, having straight front steels. The Wonderlift Bandlet is adjusted by an inside uplifting lacing, ends of laces passing through eyelets to outside of corset. This device holds the internal organs in correct position and restores them if misplaced. The Bandlet is adjusted in an instant, so that the corset fits snugly to the figure, and is free at the waist-line, promoting deep healthful breathing. Six hose supporters. Height of bust, 4½ inches. Lengths, front clasp, 12½ inches; total length in back, 18 inches. Of fine white batiste, in sizes 20 to 30.

Bandlets before adjustment correspond to *relaxed* abdominal muscles.

Complete uplifting, supporting and reducing action of Wonderlift Bandlets.

Bandlets when adjusted simulate function of abdominal muscles.

Corset correctly fitted on the figure.

WONDERLIFT

The distinctive feature of Wonderlift Corsets is the semi-elastic Wonderlift Bandlet, inside the corset, which is adjustable to exactly fit the figure and which provides perfect abdominal support from underneath. This hygienic and comfortable support prevents, relieves and often cures ailments that are beyond the reach of medicines. Each is a superb style corset of the very latest fashion lines, and a great value simply as a corset, saying nothing of the hygienic service, which is priceless.

$1.79 32C7070

Sizes, 19 to 30.

Shipping weight, 21 ounces.

Graceful and very serviceable Corset, boned throughout with **Woven Wire.** Made for the average figure of white coutil. The boning throughout this corset, except graduated front clasp steels, is of woven wire so closely woven in spiral weave that it is as flexible as the body, bending with every possible position, thus retaining the shapeliness of the corset. It is Rust Proof, and positively will not break. This model has medium high bust and full skirt. Has pretty lace trimmed top. Four suspender web hose supporters. Two retaining hooks below front clasp. Height of bust above waist line, 4½ inches. Length, of front clasp, 11 inches. Total length in back, 18 inches. **Order size three inches smaller than your waist measure taken over dress.**

$2.29 32C7072

Sizes, 20 to 30.

Shipping weight, 22 ounces.

An excellent model, for the woman of average figure who wishes a good strong, durable Corset, giving the needed support, yet so constructed as to allow extreme comfort and ease when walking or sitting. This corset is of good strong white coutil. Boned throughout except the graduated front clasp of Rust Proof **Woven Wire.** This is the same boning as used in 32C7070. The special feature of this corset is the elastic web inserts on both sides, which allows for great freedom of movement. Has medium high bust and high back. Silk embroidery lawn, trimmed top and satin ribbon bow. Full skirt. Free hip. Six suspender web hose supporters. One retaining hook. Height of bust, 4½ inches. Lengths: Front clasp, 11 inches; total in back, 19 inches. **Order size three inches smaller than waist measure taken over dress.**

$1.79 32C7074

Sizes, 19 to 30.

Shipping weight, 19 ounces.

Splendid new corset, suitable for average figures, boned throughout with Wabone. This boning is the same as used in most all high priced models. It is made of best quality cold rolled steel, covered and vulcanized with pure rubber. It is the lightest, toughest, and most elastic corset stay known. Is odorless and absolutely Rust Proof. Will not pull, crack or break. Corset may be washed and ironed as often as desired. This model has medium high bust. Wide elastic insert on each side in back allows freedom of movement. Full hip. MONTGOMERY WARD MONEY'S WORTH

This Idea *Was suggested by one of our customers for our Trademark*

ONE of our young customers sent that suggestion to us last Spring. "You ought to adopt it as your trade-mark," he said in his letter. "In the first place, it's true—I know from my experience with your house. I have always received my full money's worth in dealing with Montgomery Ward. Besides, I have had square treatment on every occasion. My experience with you is the experience of my neighbors. We know Montgomery Ward means 'Money's Worth.'"

We're proud of our business, but we're just as proud of the friends our business has made for us. It's of great gratification to us to have our customers not only think well of us, but to try to be of assistance also.

Infants' Rubens Vests

Rubens Shirts are doubtless better known than any other Infants Undershirts on the market today. The fact that there are no buttons down the front of the shirts, and that they are double across the chest and abdomen, has convinced many mothers that the Rubens Vests are ideal health garments. They fasten in the back with safety pin, one tab passing through a vent in side of vest. Length, from top of shoulder, 9, 11, 12, 14, 15, 16 or 18 inches. Color, cream only. See table of sizes. **State length wanted.**

Dress Goods and Silks

Many hundreds of new customers are going to buy our wool and silk dress goods this year, as well as our old friends who have kindly sent us their orders in the past.

Please look over the immense variety of splendid fabrics shown on the following pages—the plain, staple and serviceable suitings and the newer novelty effects, shown this season for the first time. These were never more temptingly priced, quality considered, nor more fittingly devised to fully meet the varied wants of our many thousands of dress goods customers.

Samples of Dress Goods

Our sample department is at your service if you wish to see any of our wool, silk, velvet or cotton dress fabrics before purchasing.

We do not send samples of some lines of goods because a small sample would not give you a fair idea of the goods.

Your sample request will be promptly filled and mailed to you. Samples are of ample size and are tagged with necessary information. Be sure to give the article number, the name of the goods, and the color, when you order samples. However, you can order anything from this catalogue with perfect confidence that it is just as described and illustrated.

40 in. Satin Cloth

Colors: Dark Seal Brown, Olive Green, Cadet Blue, Plum, Dark Navy or Black. State color wanted.

96c A Yard **16C1273** A satin faced novelty in all wool dress goods. Lighter weight than the other satin faced cloths we show. Woven similar to silk satin, but is a worsted fabric. A style of suiting much asked for now and one that makes up very effectively. Ship. wt., per yard, about 5 oz.

40 in. Wool Ottoman

Colors: Navy Blue, Copenhagen Blue, Black, Wine, Dark Green or Dark Brown. State color wanted.

98c A Yard **16C1289** A pure wool suiting, of fine rep weave, noted for its style when made up into skirts, suits or dresses. Ottomans similar to this one sell at about $1.25 a yard in retail stores. Shipping weight, about 5 ounces.

46 in. Satin Elysian

Colors: Covert Tan, Brown, Wine or Navy. State color wanted.

$1.48 A Yard **16C1286** A new satin-faced, fine quality, pure wool suiting. It has almost the weight of broadcloth, but it is twilled, and made of specially treated fine worsted yarn. A choice novelty for those who desire the best. Sponged and shrunk. Ship. wt., per yard, about 7 oz.

47 in. Satin Soliel

$1.37 A Yard **16C1283** Colors: Navy or Black. State color wanted. A fine, pure worsted suiting. It has a slightly ribbed weave, not raised or pronounced but showing fine lines running across from side to side. One of the most desirable suitings we have. Ship. wt., per yard, about 6½ oz.

Pin Check Motor Mohair

Width, about 36 inches.

Colors: Navy or Black. State color wanted.

48c A Yard **16C1350** A novelty style of this popular dress goods that will have great demand this year. Pin checks, with white, gives it almost a speckled effect. Neat and pretty. It is called motor mohair, because it sheds dust and wears well. Clean, bright and fine. Strongly woven, with mohair filling and cotton warp. Ship. wt., per yard, about 3½ oz.

Mohair Brilliantine

Width, about 36 inches.

Colors: Navy, Dark Tan, Dark Green, Black, Brown, Light Blue, Gray Mixture, Garnet or Cream. State color wanted.

39c A Yard **16C1353** A cloth of splendid weight, good luster and fine finish. A quality that usually retails at half a dollar a yard. Mohair fabrics are serviceable. They are clean and wear well. They are always popular for evening or street wear. Especially suitable for skirts. A bargain like this cloth is difficult to obtain. Mohair filling and cotton warp. Ship. wt., per yard, about 3 oz.

Fibre Silk Checks

Width, about 35 inches.

Colors: Gray and White, Wine and White, Brown and White, Black and White. State color wanted.

48c A Yard **16C1354** A pin checked, novelty suiting, made of cotton and artificial silk. The difference between artificial silk and real silk is hardly distinguishable; the one is as bright and lustrous as the other. Pin checks are neat, and always popular in any class of fabric. Ship. wt., per yard, about 5 oz.

A New Covert Cloth

Width, about 36 inches.

Colors: Tan, Navy, Oxford Gray, or Olive Tan. State color wanted.

45c A Yard **16C1356** Coverts are very popular. This is a wool and cotton mixed suiting, with the appearance and touch of higher priced goods. The colors are all in mixtures, the cloth of diagonal weave. High priced coverts have a mixture of cotton with the wool, as this permits of closer weaving and of twisting the yarn harder. Ship. wt., per yard, about 6 oz.

Worsted Plaids

Width, about 39-40 inches.

Colors: Green, Amethyst and Black; Navy, Green and Black; Brown, Green and Black; or Brown, Navy and Black. State color wanted.

89c A Yard **16C1470** Plaids are always stylish for Fall or Winter. This is an all-wool fabric, with the prettiest combination of colors we have ever seen. The colors are dark and harmonize with each other. The cloth is woven like a nice French serge. Make yourself at least one dress of these plaids; we are sure it will be your favorite. Retail value, about $1.15 a yard. Ship. wt., per yard, about 5 oz.

All Wool Meteor Crepe

Width, about 36 inches.

Colors: Wine, Navy, Black, Plum, Dark Cadet, Gray, Myrtle Green. State color wanted.

59c A Yard **16C1250** This is an all-wool suiting of the popular type. It is one of the staple weaves, similar to regular crepe, so the maker names it Meteor Crepe—otherwise Meteor cloth. It is really a fine granite or mommie weave, slightly rough, and with the brightness of all nice worsted fabrics. As a change from serge and other twilled weaves, you will like this attractive suiting. Samples sent on request. Shipping weight, per yard, about 5 oz.

Half Wool Maline

Width, about 36 inches.

Colors: Navy Blue, Black, Wine, Cream, Tan, Hello, Light Brown, Myrtle Green, Gray. State color wanted.

42c A Yard **16C1248** A new wool filled suiting of medium weight and attractive weave. One of our best offerings in moderate priced dress goods. A plain woven cloth with slight roughness, similar to a fine granite cloth. Cotton warp and pure wool filling. A very pleasing effect and a serviceable suiting that will make up into neat garments. Suits are being worn of light weight, plain colors this Fall. Shipping weight, per yard, about 4 oz.

Jacquard Tussah

Width, about 35 Inches.

Colors: Ivory White, Coral, Light Blue, Navy, Brown, Copenhagen Blue, Reseda, Black. State color wanted.

39c A Yard

16C2321

One of the prettiest and brightest silks we ever listed in these popular Jacquard Tussahs. Such an effective silk for 39c a yard cannot fail to prove a great attraction. Silk one way, cotton the other, but so much lustre as this one has, does not give a hint of anything but pure silk. The woven design is very new. Ship. wt., per yard, about 2 oz.

Fibre Silk Plaids

Width, about 26 Inches.

Colorings: Navy, Red, Green and White; Red, Gold, Green and White; Cadet, Tan, Navy and White; or Green, Navy, Old Gold and White. State coloring wanted.

49c A Yard

16C2350

Charming color combinations and a fine and lustrous fabric, make this one of the most desirable plaid novelties we are listing. It has a close resemblance to taffeta silk. The weave shows an exceedingly fine granite effect, the surface being covered with tiny seed like dots of rare brilliance, making a charming background for the cross bars of beautifully combined colors. A 65c value at retail. Ship. wt., per yard, about 3 oz.

Width, about inches

Satin Striped Taffeta

Colorings: Copenhagen with White and Black stripes. Dark Green with White and Black stripes; Wine with White and Black stripes; Navy with Navy and White stripes, or Navy with Navy and Green stripes. State color wanted.

98c A Yard **16C2556**

A stylish silk that will appeal to those who want the new things. All silk taffeta with narrow satin stripes of alternate colors as described above. Stripes are about 1 inch apart. Ship. wt., per yard, about 2 oz.

Width, about 24 inches

Silk Satin Plaids

98c A Yard

Ground Colors: Copenhagen Blue, Red, Navy or Green. State color wanted.

16C2559 These are all silk satin plaids, of beautifully combined colors. We give the ground colors only; select the one preferred. You will appreciate the splendid harmonizing effect produced by the other colors, forming plaid. Plaids are wanted now. Ship. wt., per yard, about 2 oz.

Note: When reordering any goods from this page, where an exact match of color is desired, be sure you enclose a sample.

If you want buttons to match the goods bought from this page, order them from Page 160.

Silk Filled Foulardine

39c A Yard

Width, about 26 Inches.

Ground Colors: Navy, Reseda, Tan, Copenhagen Blue or Black. State color wanted.

16C2342 A printed novelty with colored grounds and white figures. A soft, fine twilled cloth, silk one way, cotton the other. It resembles both foulard and messaline silk, has a pretty lustre. All such smooth and pliant dress cloths sell readily at all times. The illustration shows the figure perfectly. Shipping weight, per yard, about 2 oz.

Satin Stripe Silk

75c A Yard

Width, about 36 Inches.

Colors: Ivory White, Olive, Coral Pink, Black, Lavender, Light Blue or Navy. State color wanted.

16C2340 A plain colored silk of neat striped effect. Satin stripes, spaced half an inch apart, with pin head dots between. Silk one way, silk and cotton the other. A soft silk, lustrous and pretty. Stripes are especially wanted this year. Remember, a full yard wide. Shipping weight, per yard, about 2 oz.

Striped Pongee Silk

39c A Yard

Width, about 35 Inches.

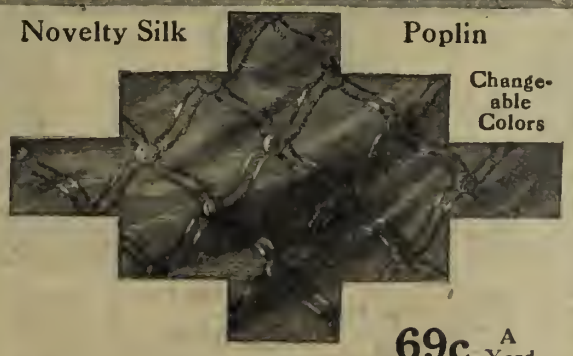
Colors: Stripes of Green, Brown, Blue or Heliotrope on Pongee Colored Ground.

16C2123 Colored stripes on linen colored ground, are always effective and pretty. These show up splendidly because the style is good, about ½ inch stripes, formed of four narrow lines. This tussah is silk one way, cotton the other; lustrous and bright and of good serviceable weight. Stripes are in demand now. Shipping weight, per yard, about 3 oz.

Satin Striped Poplin

Width, about 36 inches

89c A Yard



Colors:

White, Smoke, Wisteria, Dark Copenhagen, Old Rose, Dark Myrtle, Navy, Black

State color wanted.

16C2558 Satin ribbon stripes are always an effective style; they show up very handsomely on this silk warp poplin. A plain colored novelty with satin stripes, spaced 1½ inches apart. Width of stripes, ¾ inch and ¼ inch alternately. Silk poplins are among the favorite weaves. This pattern has cotton threads one way, silk the other. This novelty effect will no doubt be in good demand, at our low price. Many retailers ask $1.25 a yard for similar goods. Shipping weight, per yard, about 2½ oz.

Novelty Silk Poplin

Changeable Colors

69c A Yard

Width, about 35 Inches.

Royal Blue and Black, Brown and Green, Green and Violet, Navy and Green, Black and Red.

State color wanted.

16C2347 One of the most attractive of our silk and cotton mixed, dress goods novelties, because of its beautiful lustre and the newness of the woven design. The warp is of pure silk, also the waving cross lines. It has a richness and beauty hardly looked for in fabrics of this price. Soft, fine, corded weaves are so much asked for now and changeable color effects are so popular, that you will make a very up to date selection in buying this novelty crossbar poplin. This style of figure makes up charmingly. It is of solid color and shows up prettily on the changeable ground. Shipping weight, per yard, about 2½ oz.

Half Silk Marquisette

Black Taffeta

Our Golden Eagle Quality

Width, about 36 In.

$1.25 A Yard — 16C2618 You buy a splendid quality silk in our Golden Eagle Taffeta. This silk has splendid body, lustre and finish; a silk selected from many others, for its fine appearance and good wearing qualities. A full yard wide, and has a fine, shadowy lustre, seen only in the best class of taffeta. Weight, per yard, about 2½ oz.

Black Satin Duchess

Width, about 35 In.

$1.49 A Yard — 16C2634 A new silk of richness and beauty and weight. One that will give service. Duchess satin has more lustre than messaline. Black is growing in favor. You would pay about $1.75 per yard for this quality at retail stores. Black only. Weight, per yard, about 3 oz.

Yard Wide Black Messaline

$1.48 A Yard — 16C2652 This splendid messaline is a heavier silk than the average messaline. It will make up handsomely, because of its rich, shadowy lustre. Black silks are usually wanted in the finer grades. Wt., per yard, about 2½ oz.

Black Armure Silk

Width, about 23 In.

$1.18 A Yard — 16C2620 Silk armure will wear almost as long as a woolen fabric. It makes up very richly. Has splendid body, is soft and pliant, and woven in small seeded design, showing just enough figure to be different from a perfectly plain silk. Wt., per yd., about 2 oz.

Black Pailette Soie

Width, about 35 In.

$1.19 A Yard — 16C2621 A good, soft silk of fine twilled weave, beautifully lustrous. Width considered, it is an exceptionally good value. Usual retail value, $1.49 per yard. Samples mailed on request. Wt., per yard, about 2¼ oz.

Black Peau De Soie

Width, about 35 inches.

$1.89 A Yard — 16C2648 For suit, skirt or coat we especially recommend this elegant grade of Peau de Soie. Double faced, the same on both sides — reversible. This gives the silk extra body and weight. It has a soft, shadowy lustre of unusual richness and quality for this price. Wt., per yard, about 4 oz.

Black Peau De Soie

Width, about 35 inches.

$1.59 A Yard — 16C2644 Our special Black Peau de Soie. Has a shadowy, lustrous surface, almost as bright as messaline or duchess. It will make up finely and wear well. Practically a yard wide. A $2.00 value. Wt., per yard, about 2¾ oz.

Black Satin Majestic

Width, about 36 Inches.

$1.88 A Yard — 16C2656 A splendid heavy grade of fine Silk Messaline. One of the handsomest black dress silks we ever listed. In buying a black silk, we strongly recommend the finer grades. Wt., per yard, about 2½ oz.

A serviceable color, very attractive for women's or children's cloaks. You will make a considerable saving if you buy piece goods and make your own cloak. This is the usual $3.00 grade. Shipping weight, per yard, 2⅛ lbs.

Serges—

From the Loom to the Wearer

THERE is one subject on which all women agree—and all men, too, for that matter. That is serge, which someone has termed the "queen of all fabrics."

Year by year serges have been growing in popularity—good serges, particularly. To make absolutely sure of the quality of our serges, we place our orders with the mills. Furthermore, we watch these goods from the time the wool goes on the loom until the beautiful finished product is sent to you.

Yes, there is another advantage for you in our from-loom-to-wearer plan. You'll see it when you look at these prices.

Not All Roller Skates Are Used for Pleasure

When you think of roller skates, nine times out of ten you will think of children skating up and down the cement sidewalk, or you will think of a polished skating rink.

A novel use for roller skates has been discovered in a commercial way. Our floor space is about 27 acres, so the messengers, and many of the order fillers throughout our house are equipped with roller skates. The floors are smooth and they travel from office to office much quicker than they could by walking. The boys say they would rather use the skates than to walk as it makes their work easier. The saving in money is considerable as it reduces the number of boys needed.

And you can be sure you get a part of this saving in the lower prices to you.

Unbleached Cotton Flannels

Width, about 27 inches.

17C7440 We can recommend our lowest grade of unbleached cotton flannels as it is fully equal to or better than the 12c quality at most retail stores. A good stout twilled cloth, with nice, soft medium nap, which will not wear off and leave the fabric poor. Fleeced to make it soft and warm, but not enough to impair its strength or durability. This is a good grade, but the higher priced grades are, of course, stouter, wider and better. Weight, per yard, about 3¾ oz. Price, 10 yards.....88c

Bleached Cotton Flannel

Width, about 26½ inches.

17C7462 We do not list the lower grades in the bleached goods; this is a good medium quality of fairly good weight, and well suited for ordinary purposes. Weight, per yard, about 3¾ oz. Price, 10 yards.....98c

No Guess-Work About Blankets You Buy from Us

THERE is *one* safe way to determine *definitely* the exact quality of blankets. That's by an analytical test.

Weight and measure will designate bulk and quantity, but only analytical tests can show the true character of blanket material. Every blanket and comforter listed on these pages is taken apart by our textile experts, and studied and analyzed before it is offered to you.

We protect our customers from blankets rendered tender by over napping. Strength of goods is thoroughly tested before contracts are made. The processes used by the woolen mills are investigated. Methods of weaving, dyeing and finishing must comply with requirements necessary in producing highest grade products.

We not only submit *samples* to analytical tests but also make such frequent tests of goods carried in stock that our blankets always represent uniform quality.

We also do our own measuring and weighing, assuring honest pounds, honest inches and honest quality of material.

It's the same way with comforters. Unless the purchaser knows what is contained beneath the covering, he cannot know much about the value of the comforter. The body of a comforter is really the base of its value. So no matter how beautiful it may be in appearance, the right quality must be inside. We tell you exactly what each comforter contains.

You can buy from these pages with much more assurance of thorough quality, even at our lower prices, than if you bought them over a counter.

This Sewing Machine is sold by us with the understanding and agreement tha if for any reason it does not prove entirely satisfactory, it may be returned at ou expense at any time within three months from date it is received, and we wi immediately refund purchase price together with freight charges paid by purchase

Montgomery Ward & Co.

Every one of our machines—with the single exception of the Oakland—is sold t you on a 90-days' Trial, and under our ironclad 20-year guarantee. The pu chase of a sewing machine is largely a question of confidence in the seller. W have more "old-time" customers on our books than any other similar merchandis institution in the world. This striking fact offers the best evidence of the reputa tion we enjoy among our customers.

Selecting a Sewing Machine

In selecting a sewing machine you should bear in mind that "the best is always the cheapest." It is always the best policy to consider quality first, when making purchases of any kind, but particularly so when you buy a sewing machine, because you expect it to give continued good service for years to come.

A good sewing machine—a quality machine, built on merit—will be a source of constant pleasure and help to you. You cannot afford to experiment with cheaply built machines that cannot and will not render you the service that you have a right to expect.

Quality does not necessarily mean high prices; neither are high prices always a guarantee of high quality. It all depends upon where you buy your machine.

When you purchase your machine from us, you are assured of getting a quality machine, no matter whether you select our low priced Brunswick, or our best grade machine, the Damascus Grand Rotary.

Quality Our Slogan

We are one of the largest distributors of sewing machines in the world, and our success in this line is solely due to the fact that we have at all times offered quality machines at the lowest possible prices, but have never sacrificed quality in order to quote low prices. We are continually striving to improve our machines, and we can truthfully state that every one of our machines is modern and up-to-date in every particular.

In the Damascus—Vibrating shuttle or Rotary—we offer a machine that is positively in a class by itself. It is not only the equal in every way of the highest priced and highest grade machine, bar none, but it is the only machine which is equipped with an Automatic Tension, unquestionably the most useful invention pertaining to sewing machines in recent years.

Our 90 Days' Trial Offer

We know that you cannot buy a better machine than ours; we know that quality considered, our machines are lowest in price, but we do not ask you to accept our statements unconditionally. In order to prove to you that our claims of superiority, both in quality and price, are based on facts, we inaugurated our 90 days' Trial Offer. Every one of our machines is sold subject to this liberal offer if you reside in any part of the United States proper.

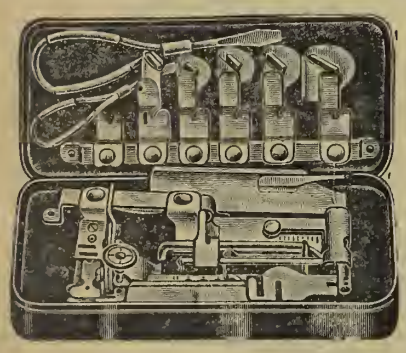
It stands to reason that we could not possibly afford to sell our machines under these liberal terms unless we were fully convinced that they will stand the test. They must speak for themselves; we must rely on their superior quality, and our exceedingly low prices, to convince you that it is to your advantage to buy from us.

Our trial offer gives you every opportunity to test our machines most thoroughly, and to verify the claims made for them. Order any one of our machines, test it in any way you like, put it alongside any other machine, regardless of name or make; test them side by side, ask the opinion of your neighbors and friends. If our machine does not prove superior, if you do not find it a striking value at our price, or if you are not fully satisfied for any reason whatsoever, return it at our expense and we will promptly refund the purchase price, including all transportation charges. Could anything be fairer? We assume all the risk, while you place yourself under no obligation whatever.

Our 20 Years' Guarantee

We do not stop at this trial offer, but guarant our sewing machines for 20 years from date purchase. (See guarantee printed above.)

This guarantee applies to every one of our m chines with the exception of the Oakland, whi we guarantee for 5 years.



This broad guarantee fully protects you in t future. It means that the machine you purcha from us must give you almost a lifetime of servic It means, also, that you will, if it should becon necessary, at all times be able to secure repairs extra parts for machines purchased from us.

Our Instruction Book

An argument frequently offered by sewing m chine agents is that it is impossible to learn operate a machine, except with the assistance of demonstrator. Let us reassure you on that poin Our machines are easy to operate. You will ha no difficulty whatever in learning to operate the successfully with the aid of our instruction boo It explains every operation in plain language. W can furnish these books in any language. It al teaches you how to use the various attachment Please remember that if you are unable to opera the machine successfully, you are at liberty to r turn it to us at our expense.

The Ideal Way to Buy

No machines, quality considered, are lower i price. A trial test is worth more to you than thousand testimonials, hence our 90 Day Tri Offer. Our machines will give a lifetime of sati faction—our 20 Year Guarantee secures it for yo Could anything be fairer? In dealing with us yo take no chances. You are the judge of the merit our machines. The decision rests entirely wit you, and we cheerfully abide by it.

Our Greist Attachments are made of nickeled steel. They are put up in neat, velvet-lined metel boxes. Damascus Grand Rotary

The Sewing Machine that Sells Itself

A WOMAN sewing for the first time on a Damascus Grand Rotary experiences a new sensation in the operation of a sewing machine. A sensation produced by a machine running so light, so easy, with so little effort that it almost seems to run itself; a machine running so quietly, with so little vibration, that it seems to be standing still; yet at the same time producing a perfect stitch with a speed nearly twice that of the ordinary machine.

It is this easy-running quality, noiseless speed, and its ability to turn out a beautifully perfect stitch that won for the Damascus Grand Rotary its world-wide reputation, and made us the largest single distributors of Rotary Sewing machines in the world. We do not hesitate to say that the Damascus Grand Rotary is today one of the finest sewing machines made. There is no other make or style of sewing machine that has all the superior features and advantages of this Damascus Grand Rotary.

Here's the Secret

The secret of the Damascus Grand Rotary success lies in the rotary shuttle. (Illustrations No. 1 and 2.) As the needle passes through the cloth, a small, sharp, pointed hook on the end of a revolving shaft catches the upper thread, carrying it around the bobbin. This hook and shaft are practically a solid block. (Illustration No. 2.) Nothing to need adjusting, to come loose, or wear.

Think what this means to you. It means that just one small, revolving shaft takes the place of the noisy shuttle, shuttle carrier and shuttle lever of the vibrating machine. With its unfailing accuracy, it means that skipping of stitches is practically unknown. It explains why the Damascus Grand Rotary is so much easier to run than other machines. Only a small shaft revolving continuously in one direction, instead of several heavy parts being rapidly vibrated back and forth, which, of course, increases the load and shakes the machine.

This same simplicity is found throughout the entire machine, which with the high quality of material and workmanship assures you of a machine of extraordinary durability. One that will make the same perfect stitch and sew with the same ease and comfort twenty years from the day you bought it as it does the day you took it from the crate.

The Automatic Tension

The automatic tension is an important and exclusive feature of the Damascus Grand Rotary. Figures show that ninety percent of sewing machine troubles are due to tension. A perfect stitch requires a certain amount of tension for each different grade of work, and that it should be a perfectly smooth, even tension at all times. Every woman who sews knows, that, to secure the proper tension it must be adjusted with each different grade of goods, sometimes with a considerable loss of time and material in experimenting.

With the Damascus Grand Rotary automatic tension, all this trouble, this loss of time, this bother and inconvenience is done away with. It assures a perfect stitch regardless of the kind of work. It means, so far as you are concerned, that tension trouble is a thing of the past; that you can sew any garment, regardless of the kind of cloth or thread, without loss of time or temper, with the pleasure and satisfaction of always having a perfect stitch. If time means money to you, if sewing is distasteful, if you have ever been disgusted with the way your machine sews, and if you want to know real comfort and ease in running a sewing machine, you will want a Damascus Grand Rotary equipped with the automatic tension.

The Damascus Grand Rotary Has All the Important Features of High-Priced Machines and Many That are Exclusive

There are also many other improvements in the Damascus Grand Rotary that have added to the comfort and pleasure of sewing. To adjust the length of stitch it is not necessary to loosen and tighten a thumb nut. Merely push the little lever (see illustration No. 4) to the length of stitch desired and there it stays; no danger of coming loose in the middle of your sewing and spoiling the stitch.

You cannot break the lower thread by filling the bobbin too full, because the bobbin winder automatically stops winding when the bobbin is filled with the proper amount of thread.

With the exception of the needle, the entire machine is self-threading. You can almost thread it with your eyes closed. The sewing arm is exceptionally large, allowing for easy handling of the bulkiest materials. It is fitted with two spool pins so that you do not have to unthread your machine to wind the bobbin.

The dress guard on the flywheel is so arranged that the wheel cannot become unbelted when the head is let down.

The Damascus Grand Rotary is also equipped with ball-bearing stand; automatic presser bar; extra heavy flywheel; easily accessible holes for oiling, etc.

It's the sewing machine you want if you want the best. Most unmistakably, **Seeing Is Believing.** So order your Damascus Grand Rotary today. See its beautiful cabinet—give it a trial and see the fine sewing it does—then decide.

DAMASCUS

lighest Grade Vibrating Shuttle Ball Bearing Sewing Machine

he Damascus Sewing Machine, illustrated here and on the owing pages, represents the highest achievement in the manu- ure of vibrating shuttle machines. No matter what price pay elsewhere, you cannot buy a better constructed, or more able machine.

ur Damascus Model is the equal, in every respect, of machines sold by ts for $40.00 to $60.00. It is—with the exception of the Damascus id Rotary Model—the easiest working machine that we know of. No nse has been spared to construct the Damascus as nearly mechanically ect as is possible. Every part entering into the construction is tested and ed, and fits perfectly. All parts are interchangeable. You will always ble to secure extra parts should you require them.

Easy to Operate—You do not have to be an expert to use a Damascus. s easy to operate. We furnish a complete Book of Instructions, which ains every operation, and tells you how to use the different attachments.

Lock-Stitch Type—The Damascus makes the popular lock-stitch, formed double threads. The upper thread feeds from the needle, and the lower from the bobbin, enclosed in the shuttle.

The Simplicity of Construction

ur Damascus Model is a most important feature. The s complicated the mechanism, the greater the likelihood ne machine getting out of order. Every machine we send is carefully inspected and tested by experts. It is not ssary for you to adjust or regulate the Damascus in any

n selecting your sewing machine, you should pay par- ar attention to the sewing head, as it is the part which your work. The selection of the cabinet is a matter of , and of secondary consideration.

We urge you to read our description of the Damascus Vi- ing Sewing Head carefully, and call your special attention he exclusive feature of the Damascus—**the Automatic ion.** which is fully described on a preceding page in con- ion with the Damascus Grand Rotary Machine.

The Sewing Arm of the Damascus is full size, extra high, and symmetrical in design, and massive in construction. ffords ample working space underneath the arm for con- ent handling of even the bulkiest materials.

The Sewing Arm is made of the highest quality of gray , ground and polished smoothly, and covered with three s of black luster enamel. Each coat is baked on separately, rubbed down by hand. The arm is then decorated taste- with a design worked out in gold and colors, and covered a final coat of high grade, hard transparent varnish. latter is baked on at a high temperature, producing a smooth and glossy surface that will resist wear for years, and will not check and peel off.

All working parts are made of the highest grade tool steel, carefully hardened in oil and nickel plated, to prevent rust- ing. All bearings are carefully adjusted and properly tempered, to minimize friction.

The Needle is short and sharp pointed, and does not bend or break easily. It is self-setting.

The Improved Presser Foot is so constructed that you can feed over the thickest seams with ease, yet it will not pucker or mar the finest silk or chiffon. Both prongs extend an equal distance from the needle, as does the roller-bearing feed.

The Shuttle is large size. It is cylindrical in shape, made of the finest quality tool steel, nickel-plated.

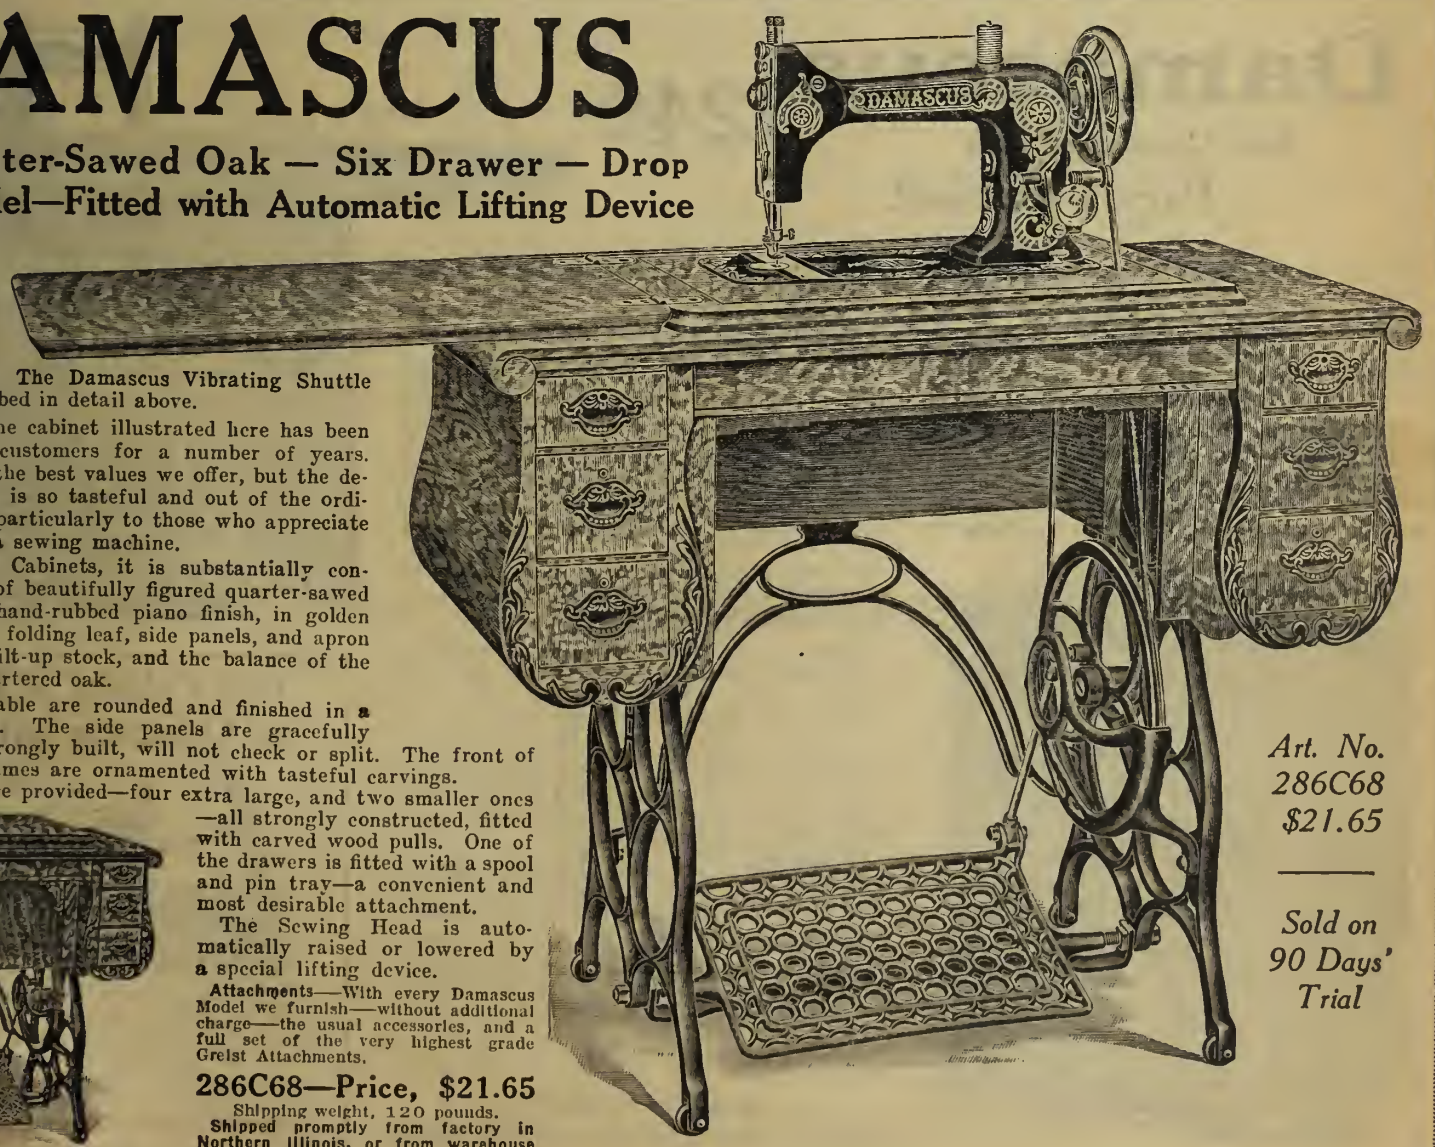
The Stitch Regulator, controlling the length of the stitch, is operated by a thumb screw sliding in the bed of the machine, near the base of the arm. It is provided with an indicator, to show the length of the stitch being made.

The Automatic Bobbin Winder, with cam-driven guide, winds the bobbin perfectly and evenly.

The Woodwork—The same high standard of quality maintained throughout in the construction of the sewing parts, applies also to the woodwork furnished with the Damascus Machines.

Only the choicest grades of carefully selected quarter-sawed oak, air-seasoned and kiln-dried, are utilized throughout in the construction of the Damascus cabinets. The surface is finished in an attractive golden oak color. It is treated with a hand-rubbed piano finish, which brings out the beautiful natural grain of the wood, producing a magnificent piece of woodwork that even the most critical will be proud to have in their home.

The Ball-Bearing Stand of the Damascus is attractive in design, strong in construction, easy and quiet in operation. Made of the finest quality of gray iron, well braced. Finished in black enamel. Fitted with easy-rolling casters.



A belt-retaining dress guard is also provided, which prevents the machine from becoming unbelted when it is closed.

Attachments—In addition to the usual accessories, which include 12 needles, 6 bobbins, thread cutter, screw driver, gauge, oil can (filled), and illustrated Instruction Book, we furnish without charge, a complete set of Greist Attachments, as follows: Ruffler, tucker, braider, 5 hemmers, special foot, under-braider, and shirring slide. Put up in a polished black japanned metal box.

The Sewing Head. The Damascus Vibrating Shuttle Sewing Head is fully described on the preceding page. It is identically the same on all Damascus Models. Before you select your machine, be sure to study the important features of the sewing head; the selection of the woodwork is purely a matter of choice.

The Woodwork. The cabinet is massive in construction, substantially built of the choicest grades of beautifully figured quarter-sawed oak, hand-rubbed piano finish, golden oak color. The table, folding leaf, and stationary drum, are made of built-up stock, and the balance of the woodwork is solid quarter-sawed oak. The design is most artistic—it is one of the most beautiful cabinets we offer.

Seven exceptionally strong constructed drawers are provided. The four extra large and roomy side drawers have slightly curved fronts. The center top drawer swings on a pivot. All are fitted with fancy solid brass pulls.

A tape measure, 18 inches long, divided in inches and centimeters, is transferred under the varnish, on the table in front of the sewing head, for convenient use of the operator.

A most desirable feature is the lifting device, which automatically raises or lowers the sewing head whenever the top lid is opened or closed. The sewing head is protected from dust by a stationary drum.

Attachments — With every Damascus Model we furnish, without additional charge, the usual accessories, and a full set of the very highest grade Greist Attachments. Shipping weight, 130 lbs.

Damascus

Full Quartered Oak Parlor Cabinet

$24.60

If you desire the highest grade shuttle machine, mounted on a choice parlor cabinet, you will find the machine illustrated here an unusual combination of quality and attractiveness. It is a cabinet that will readily harmonize with the most select furniture. Is so constructed that it will insure perfect comfort when sewing.

The Damascus Vibrating Shuttle Sewing Head is fully described on a preceding page.

The Woodwork. This cabinet is one of the most beautiful—both in design and finish—we have ever offered. It is a two-door, compact, full quarter-sawed oak cabinet, equipped with chain and lever automatic lifting device.

The door panels, sides and top lid of cabinet are constructed of built-up stock, the balance of the woodwork is of solid quarter-sawed oak.

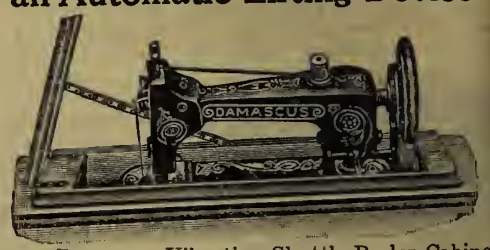
The two-corner pilaster and the overlapping molding where the doors meet are ornamented with a beaded carving. There is a handsomely designed embossed ornament in the center of each panel as well as on the top rail of each door. On the inner side of each door is a pocket for holding attachments and accessories. The sides and back of cabinet are of a panel design.

The cabinet is finished in a dark golden oak rubbed piano finish. The top lid is particularly highly polished.

A tape measure, length, 18 inches, divided into inches and centimeters, is transferred, under the varnish, on the table in front of the sewing head, for convenient use of the operator.

The drive wheel runs on improved, noiseless ball-bearings. The castings are all securely anchored to the woodwork, and will not become shaky. There is practically no vibration while the machine is in operation.

The treadle is accurately balanced, hung on adjustable steel centers. Ample space is provided for the knees of the operator while sewing.



Attachments—With every Damascus Model we furnish, without additional charge, the usual accessories, and a full set of the very highest grade Greist Attachments, described on another page.

The Windsor B

Ball Bearing—Vibrating Shuttle
High Arm Sewing Machine

THE Windsor B is a machine any woman would be proud to own. It represents a most unusual combination of quality, high efficiency and low price.

When looking for a medium-priced machine equipped with the most dern improvements, you cannot make a better choice than the indsor B. A strictly high-grade, easy-running machine, equal in ery way to those offered by agents for $30.00 or more.

he Windsor B is equipped with the disc style tension, a type that is easily usted and has given universal satisfaction. This is evidenced by the fact t the majority of the best known machines today are fitted with the disc sion.

ead Our Description Carefully. Note the desirable features of this model.

n make comparisons with machines offered elsere at considerably higher prices, and you will dily see why it is to your advantage to place r order with us.

n comparing prices, please bear in mind that our e includes not only the usual accessories, but a set of high-grade Greist Attachments as well; , that most of our cabinets are equipped with automatic lifting device—a most convenient fea-e.

What the heart is to the human body, the head is the Sewing Machine. It is that part of the ma-ie which produces the work. Unless it is properly structed, and the working parts are of superior lity, carefully made and properly adjusted, you e an inferior machine, no matter how attractive nay be in appearance, or how strongly recom-ded.

very working part of the Windsor B Model is hanically perfect. Only the very best materials used in construction. All bearing surfaces are fully hardened to prevent wear.

he Sewing Arm is extra high and massive in struction and, by reducing the vibration to a imum, causes the machine to run smoothly. ple working space is provided (5½x8 inches) ch insures easy handling of bulky materials.

The bed plate measures 6¾x14½ inches. The arm is finished with three coats of baked-on black enamel, tastefully decorated. It is covered with a final coat of high-grade varnish, producing a smooth, brilliant surface, that will not check. All bright parts of the machine (rim of hand wheel, face plate, etc.) are heavily nickel plated, to prevent rusting.

The Disc Tension is of the latest, improved type, and can be quickly and easily adjusted.

The Automatic Tension Release is a most convenient and desirable feature. By raising the presser foot, the tension on the thread is released automatically, and you can draw the work from under the presser foot without breaking the threads or damaging the needle.

The Take-Up is positive. No springs are used in its construction and operation. It controls the thread perfectly on all classes of work, and insures even and perfect stitches.

The Needle Bar is round in shape. Made of the highest grade tool steel, properly tempered. Fits perfectly. It is positive in action. There are no springs to weaken, or cause trouble.

The Needles are self-setting. The shank is flattened on one side and fits snugly into a groove in the needle bar.

The Presser Bar is round. It is fitted with a cap-covered spring, and is quickly and easily adjustable to different thicknesses of materials.

The Presser Foot extends on both sides of the needle. It holds the goods firmly in place.

The Feed is positive in action, being operated and controlled by the main shaft. Cannot get out of order, as no springs are used.

The Shuttle is of large size. Cylindrical in shape, made of the finest quality tool steel, nickel plated. Fitted with an adjustable steel spring, for regulating the lower tension. It is self-threading.

The Bobbin Winder is automatic in action, and insures a perfectly wound bobbin at all times.

The Stitch Regulator, controlling the length of the stitch, is operated by a thumb screw sliding in the base of the arm.

The Stand is made of cast iron, well braced, of pleasing design, black enameled, and fitted with easy-rolling casters. The Drive Wheel is made extra heavy, and is fitted with improved noiseless Ball Bearings, causing the machine to run easily. It is equipped with belt-retaining guard, which prevents the machine from becoming unbelted when it is closed.

The Sewing Head

The Windsor B Vibrating Shuttle Sewing Head is fully described on the preceding page.

The Woodwork

The cabinet illustrated here is our very latest design. It is one of the most attractive patterns ever brought out, and will strongly appeal to true lovers of high grade furniture. The crescent style, gracefully curved drawers are most pleasing to the eye. Only the choicest pieces of beautifully figured quarter-sawed oak, finished in a rich dark golden oak color, are used in the construction. The table (with curved front), table frame, drawer frame, and head frame, are made of solid stock. The top lid is constructed of 5-ply, built-up stock, with quarter-sawed oak veneer on the inside and outside. The drawers and drop front, or apron, are also of built-up stock, veneered with quartered oak on the outside. The drop front is decorated with an embossed border. The drawers are exceptionally large and roomy, strongly constructed, and fitted with solid brass pulls.

A tape measure, length, 18 inches, divided into inches and centimeters, is transferred, under the varnish, on the table in front of the sewing head, for convenient use of the operator.

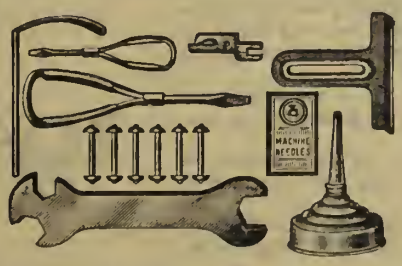
Sewing Machine Supplies and Repairs

We can furnish extra parts and supplies for not only every sewing machine we have sold in the past, but for any other make, provided it is still being manufactured.

In ordering parts for any one of our machines, it is absolutely necessary for us to have the name and number of the machine. By number we mean not only the number of the article in our catalogue, but also the machine number. The latter you will find on your guarantee, also underneath the front shuttle slide of all vibrating shuttle machines or on the base of the sewing arm of our rotary models.



In the instruction book, which we furnish with all of our machines, you will find complete lists of the various parts and their prices.

When ordering repair parts for machines other than ours, we require the name of the machine and sample of the broken parts. You will find our charges to be very reasonable and much lower than those made by agents.

Sewing Machine Needles

No machine can do good work unless you use the proper needle. There is no such thing as a universal needle. If you do not use a needle made for your machine, the machine cannot do good sewing. Our needles are of the highest quality, properly tempered and pointed, and of superior finish. They are especially made for the machines they are to be used with.

Accessories Free!

With every one of our machines we supply the following accessories free of charge: Twelve assorted needles; six bobbins; one large nickel-plated screw driver; one small nickel-plated screw driver; one quilter; one cloth guide; one wrench; one hemmer foot; filled oil can; and complete Book of Instructions.

Montgomery Ward & Co. Needles

All vibrating shuttle machines bought from us since 1890 use the same flat shank needles. We do not require a sample when an additional supply is needed. When ordering needles for machines bought prior to 1890, be sure to send sample (pinned to a piece of cardboard or cloth to prevent loss in transit), to insure proper match.

On orders for our Rotary machine needles, we also must have a sample, as we carry two styles of needles for this machine.

We also furnish needles for machines of all other makes but must have samples and name of machine to fill orders correctly.

We always prefer to have you give us the name and number of machine, when you place an order for needles, as we are then enabled to send exactly what is wanted.

Brunswick
High Arm Sewing Machine

In the Brunswick Model we offer a dependable and, so far as sewing qualities are concerned, strictly high grade, full-sized sewing machine, that will more than hold its own with machines sold by agents at double our price. It will meet the requirements of those who desire a reliable, low priced machine, that will handle all kinds of work—light or heavy—equally well, and give general satisfaction. True, it is not equal in workmanship, finish, and material, to our higher priced models, but any of our Brunswick machines will do excellent work, and satisfy you in every particular.

The Brunswick runs quietly and easily, and makes the double lock stitch—a stitch that is always smooth, even, and perfect.

All working parts are made of fine quality steel, which—with proper care—will last a lifetime. Each machine is carefully inspected before it leaves the factory, and will reach you perfectly adjusted.

Below you find a detailed description of the Brunswick Sewing Head—the vital part of the Sewing Machine. We urge you to read it carefully. The sewing head is identically the same on all of our Brunswick cabinets. The price of the latter depends upon the woodwork you select.

In comparing prices, please bear in mind that our price includes not only the usual accessories, but a full set of high-grade Greist Attachments.

The Sewing Head, on all Brunswick Models, is the High Arm Pattern. It is well proportioned, and so constructed as to allow easy handling of bulky materials. Height of Arm, from bed plate to underside of arm, 5¾ inches. Distance from needle point to base of arm, 7¾ inches. Size of bed plate, 6¾x14½ inches. The arm is finished with three coats of baked-on enamel, attractively decorated. The rim of the balance wheel, face plate, shuttle slides, presser bar, etc., are heavily nickel-plated.

The Needle Bar is round in shape. Made of the highest grade tool steel, properly tempered. Fits perfectly. Positive in action. There are no springs to weaken, or cause trouble.

The Needles are self-setting. The shank is flattened on one side. It fits snugly into a groove in the needle bar.

The Presser Bar is round. It is fitted with a cap-covered spring, and is quickly and easily adjustable to different thicknesses of materials.

The Presser Foot extends on both sides of the needle. It holds the goods firmly in place.

The Feed is positive in action. It is opera and controlled by the main shaft. Cannot get of order, as no springs are used.

The Take-Up will control the thread perfec Never allows skipped or uneven stitches.

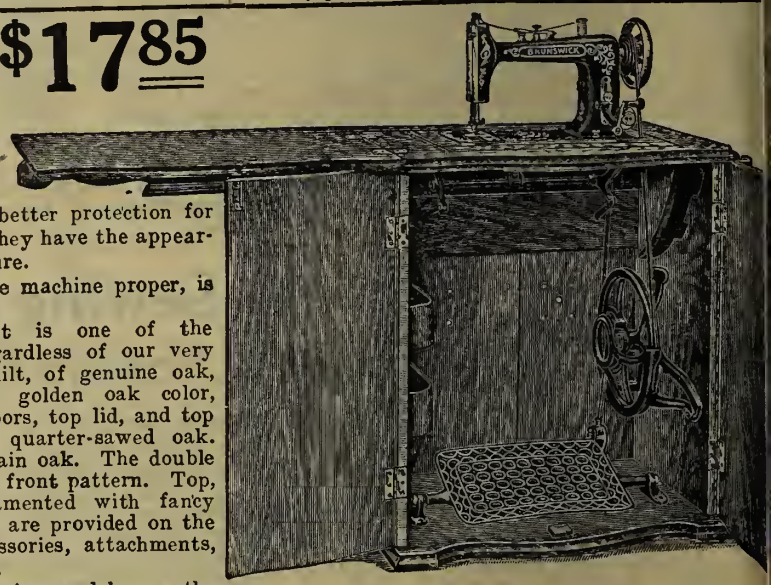
The Shuttle is self-threading, cylindrical in sha Made of the highest grade tool steel. It is eas removed from the carrier for inserting the bobbin

The Shuttle Carrier holds the shuttle firmly place by means of a spring lining, and prevents from rattling when the machine is in operation.

The Tension, with convenient release, is pla on top of the sewing arm, and is simple in constr tion. The pressure on the thread can be regula by means of a thumb screw.

Other Features of our Brunswick Model are automatic Bobbin Winder and Stitch Regulat All bearings are made of hardened steel, prope fitted, to minimize friction.

The Stand is made of cast iron. It is well brac and of pleasing design. Finished in black enan Fitted with easy-rolling casters. The Drive Wh is made extra heavy, and fitted with improv noiseless Ball Bearings, causing the machine to r easily. It is equipped with belt-retaining wheel, dress guard, which prevents the machine from coming unbelted when it is closed.



The Treadle is made in a broad pattern, stron constructed, and hung on adjustable steel bearings

Attachments—In addition to the usual acc sories, which include 12 needles, 6 bobbins, thre cutter, screw driver, gauge, oil can (filled), and ill trated Instruction Book, we furnish, without char a complete set of Greist Attachments, as follow Ruffler, tucker, braider, 5 hemmers, special foot, der-braider, and shirring slide. Put up in a polish black japanned metal box.

Brunswick $17.85
Parlor Cabinet Model

Fitted with Automatic Lifting Device

Full cabinet machines are very desirable. They not only afford better protection for the Sewing Head, but when closed they have the appearance of an ordinary piece of furniture.

The Brunswick Sewing Head, the machine proper, is fully described at top of page.

The Woodwork. This cabinet is one of the most attractive designs made, regardless of our very low price. It is substantially built, of genuine oak, beautifully finished in a bright golden oak color, hand rubbed finish. The double doors, top lid, and top rail, are constructed of built-up quarter-sawed oak. The balance of the woodwork is plain oak. The double doors are made in an oval or swell front pattern. Top, center, and side pieces are ornamented with fancy mouldings. Two solid oak pockets are provided on the inside of cabinet for holding accessories, attachments, etc. Cabinet is fitted with casters.

The Folding Top automatically raises and lowers the sewing head whenever cabinet is opened or closed.

A tape measure, length, 18 inches, divided into inches and centimeters, is transferred, under the varnish, on the table in front of the sewing head, for convenient use of the operator.

The Ball Bearing Wheel and the Treadle are securely attached to the frame of the cabinet, and will not become shaky.

ATTACHMENTS. A complete set of genu Greist Attachments, as well as the usual accessor are included with every machine.

Our Low Priced Machine

The Oakland

$9.45

For the benefit of those who do not care to pay the prices we ask for our Brunswick or Windsor Models, or who desire a machine for temporary use, we offer our Oakland Machine.

While this machine will do good work, and is a far better value than you could reasonably expect at this price, naturally it is not as well constructed as our Brunswick model; neither does it run as easily.

If you can possibly do so, we urge you to buy one of our higher priced models, because we know you will be far better pleased. The difference in price is so small that, considering the greater satisfaction they will give you, it is not worth mentioning.

In choosing a machine, you should bear in mind that it must give continuous good service in order to satisfy you. As a sewing machine, in most cases, is bought but once in a lifetime, the best policy is always to buy the highest grade, because it really is the cheapest in the long run.

However, if you do not care to spend more than $10.00 for a machine, then order the Oakland, which we guarantee against defects in workmanship or material, for 5 years from date of purchase.

The sewing head of the Oakland is substantially built. It is enameled in black, nicely decorated. The automatic bobbin-winder is of the same mechanical construction as that on our high priced sewing machines.

The stand is made of round iron, black enameled. The woodwork is finished in oak. There are five drawers. The machine is fitted with self-setting needle, and self-threading shuttle.

The Brunswick

Five or Seven Drawer Machines

$12.30

If you are looking for a reliable, low priced machine, you nnot possibly make a better choice than this model. here is no greater value for your money.

Don't get the impression that this machine, on account of our extremely low price, ust be of inferior quality and workmanship. It is the equal in every way to maines offered by agents for $25.00, or even more. It stands to reason that we could not afford to send this machine to your home on 90 days' trial and guarantee it for 20 years, unless it were a strictly dependable and reliable machine, one that will give a much better account of itself than you would reasonably expect.

The Sewing Head of the Brunswick model is fully described on the preceding page.

The Woodwork is of a most attractive design, one that is generally used only on high priced machines. Solid, plain oak is used in the construction of the frame, and the top lid is built of heavy, built-up quarter-sawed oak, handsomely finished in a dark golden oak color. The table has a scalloped front. The drawers are large and roomy, ornamented with attractive carvings, and fitted with wood pulls.

The Brunswick

Five Drawer Sewing Machine itted with Automatic Lifting Device

$15.90

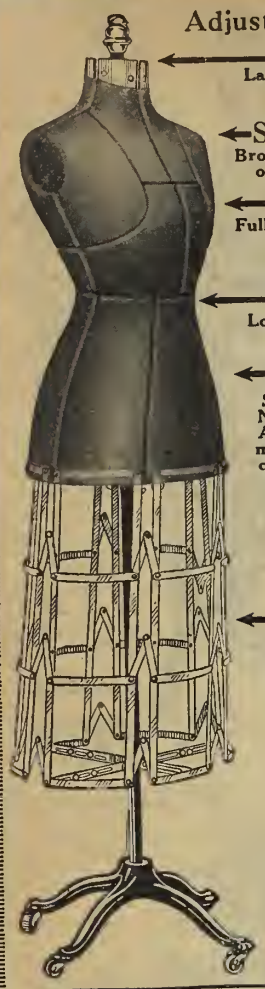
The machine illustrated here is another splendid value that cannot be matched elsenere. For years this model has been a favorite with our customers. It is one of the ost pleasing designs ever brought out, and the very low price we ask makes this achine a ready seller.

The Brunswick Sewing Head is described in detail on the preceding page.

The Woodwork. The cabinet is handsomely finished in a rich golden oak color. The table and drawer frame are of solid oak, and the drum and curved side panels are made of built-up oak. The top lid, drawer fronts, and bracket are constructed of genuine quarter-sawed oak veneer (built-up stock). The four side drawers are strongly constructed, large and roomy, fitted with carved wood pulls. The table is finished in a neat scroll pattern; carved ornamentations add greatly to the appearance of the cabinet. The general design of this model gives a most pleasing effect, and will satisfy the most critical.

This cabinet is also fitted with an automatic lifting device, which raises or lowers the sewing head whenever the top lid is opened or closed.

A tape measure, length, 18 inches, divided into inches and centimeters, is transferred, under the varnish, on the table in front of the sewing head, for convenient use of the operator.



Attachments—In addition to the usual accessories, we furnish, without additional charge, a complete set of high-grade Greist Attachments.

Dressmaking at Home

The art of dressmaking can no longer be called a gift. Long experience is not necessary. Your own shape or that of any feminine member of your family can be quickly and accurately reproduced on this remarkable new form. **Changing styles nor different corsstlng** cannot affect ths usefulness of this form. Your dressmaker may use this form to relieve you of tiresome standing and fittings or be your own dressmaker. This efficient dress form will help you work correctly, save you time and money.

Practically Indestructible

Will Give Years of Effloient and Satisfactory Service. Yet it ls so simple a schoolgirl can operate it. No intricate mechanism to mystify you. All adjustments ars made with a patented epring-friction slide. Esch of its 18 sections is adjustable separately; simply pull the sections out to meet your measurements and proportions and they will stay set. This form is not merely extensible but **perfectly adjustabls** and can be shaped to reproduce your figure. The body part is made of specially prepared, very light weight, yet strong papier mache, which is covered with good quality non-crocking black jersey cloth. All metal parts made of stamped nickeled steel.

Absolute Stability of Adjustment

Preventing any possible chance of the accidental shifting or changing of sections of the form while using, thus averting the troublesome annoyance of resetting to desired measurements and proportions. Once set, the Independent remains set, until you change it.

Save Time. Save Eyesight. What It Is.

Sew-on-o-gram is not a foundation, but a real embroidered initial or monogram without filling or padding. It is made of solid embroidery stitches. It is heavily embroidered and the absence of padding insures it against becoming flat after washing.

No knowledge of embroidery is necessary to apply Sew-on-o-gram. It comes to you completely embroidered. Any one who can use a needle can attach it. A few overstitches (using the cotton you buy with the initial) holds it firmly to the article to be embroidered. Then the background is brushed away, leaving a clean-cut, high initial equal to the best handwork.

It is to be had in many styles and colors, as shown below.

What It Does.

Sew-on-o-gram puts within the reach of every woman the ability to embroider everything that can be embroidered. Besides beautifying articles for her own use, it presents an opportunity for solving many gift problems.

The little time necessary to apply Sew-on-o-gram makes it fill a long-felt want for the woman who can embroider but hasn't time. Equally well does it serve the woman who has time but no knowledge of embroidery work. A whole set of linens can be beautifully initialed, scalloped or decorated in the time it takes to execute one piece by hand embroidery and the finished work is equally satisfactory.

Sew-on-o-gram can be applied to any material from the finest to the coarsest.

New Idea. Modern Way. How to Do It.

Note carefully: To get satisfactory results from Sew-on-o-gram, instructions must be followed.

Place the Sew-on-o-gram on the article to be embroidered and attach by overstitches firmly and when the points are carefully tacked down, remove background.

Employing a stiff brush (preferably a nail scrub), tap the brown cloth vigorously with the points of the bristles. The background will immediately disappear.

Caution: Do not attempt to remove cloth until Sew-on-o-gram is securely fastened.

Owing to the delicate texture of the chemically treated cloth which forms the background, care should be exercised in the handling before Sew-on-o-gram is attached.

How the Government Helps Us Save You Time

Right in the center of our Chicago store is a Post Office. Not a Post Office like you generally see but one the Government has arranged to save time for the Post Office Department, for us, and **for you.** This Post Office sells no stamps, delivers no mail, does nothing except receive the packages and letters from us to you.

All these packages are carried on belts from our shipping room direetly to the Post Office. There is a steady stream of them. No a minute is lost anywhere along the line, from the time the order is received, until the Postal Clerk has the stamped package ready to go in the mail sack. Even then no time is lost. The sack, when full and closed, is dropped into a chute on our second floor, slides down into a motor truck, and is hurried away to fast mail train that will deliver the shipment to you in the least possible time.

It requires from sixty to one hundred Government employees to take care of the postal work at our different houses, the greater number being used, of course, at holiday times.

Better Underwear at Lower Prices

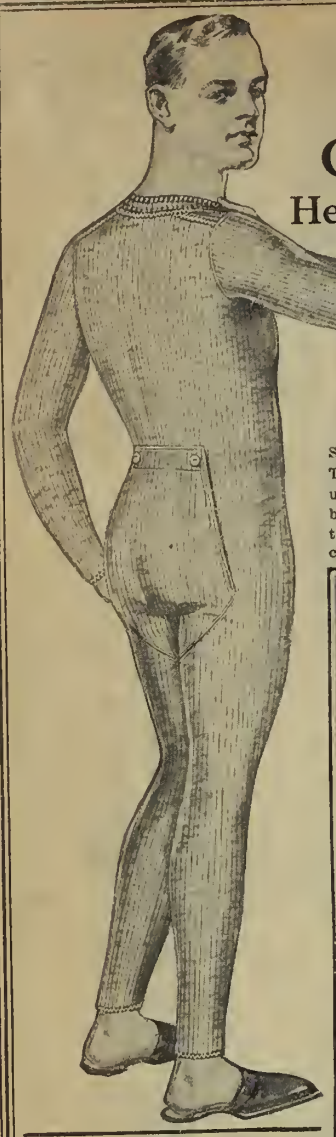
You want your underwear to fit you, to keep you warm; yes, serve you in every way with satisfaction. Perhaps you are ller than the average man. You need a few inches more in the eeves and legs of the garment you wish to buy. Or, you are of outer build. The average union suit is too long in the sleeves id in the legs. No matter what the build, here is the union suit r you.

Cotton of the finest from the sunny Southland. Warm, clean wool from healthy sheep; downy soft, silky smooth, fleecy warm: that's the story of this underwear. **Sized to fit just right,** strongly put together.

Finished with unusual thoroughness. **Packed in clean, sanitary envelopes.** It will reach you in a perfect condition and you will surely be pleased.

There's Warmth in Every Thread—Comfort from Ankle to Neck

The two men pictured above are wearing remarkably good underwear. ney are sightly, sturdy winter undergarments, good all through and with tra comfort features to make them still better. The material is closely ribbed nit of eighty-four per cent fine combed cotton and sixteen per cent clean, arm wool. Made in heavy weight. Properly sized. Splendid workmanship. ade with collarette neck. Fit snugly and keep out winter wind. Never p. Ribbed military shoulders, takes strain away from shoulder seams when ooping. Closed crotch, and comfortable, wide-lapped seat. Ribbed cuffs on eeves.



We have had this material made up in four different garments—29C202 for average ed men; 29C203 for tall men only (the sleeves and legs being about three inches longer an 29C202); 29C204 for stout men only (the sleeves and legs being about three hes shorter than 29C202); 29C205, made with specially constructed **Drop Seat.** sing with three pearl buttons. In this last garment you have all the comfort of a pair of uwers with the convenience of a union suit. A crotch always closed by only one thick- ss of cloth.

Do you want a wool and cotton Union Suit for winter of much lighter weight than the usual heavy underwear? Many men who do not work a great deal out of doors during the cold winter, wish warm underwear, but not the bulk and weight of heavy wool and cotton. This garment is knitted on a spring needle machine which produces a firm, fine, but very elastic rib. Contains over one-fourth wool, the balance fine, combed cotton. Elastic military shoulder, wide lapped seat and closed crotch. Elastic ribbed cuffs on sleeves and at ankles. Worth $2.50 at retail.

Swiss Ribbing Never Binds

Swiss ribbed underwear is the most elastic made. There is a special constructed strip of ribbing on each side of the garment, both front and back. This allows for extra expansion wherever needed, such as calves of legs, biceps of arm or about hips. No matter in what position a man may get, this material will always give and the garment will never bind. It not only will expand with the body but clings to the body closely, never losing its shape. Only our numbers 29C290, 29C291 and 29C294 have this Swiss Ribbing Construction and are described below.

Many people prefer the shirts and drawers for their boy instead of the Union Suit. We have had these garments made especially for us of about fifty per cent selected wool, the balance, good, combed cotton. The price is moderate and is exceptionally low for garments of this quality, containing the amount of wool these do, and are practically non-shrinkable. They are plain knit, which is much closer than those knitted on a ribbing machine, thus insuring a very warm, comfortable garment. Ribbed cuffs on sleeves and at ankles.
